

SCHEDULE 1

Doses of Ionising Radiation within the meaning of “Radiation Emergency”

3. In this Schedule—
- (a) any reference to an effective dose means the sum of the effective dose to the whole body from external radiation and the committed effective dose from internal radiation;
 - (b) any reference to equivalent dose to a human tissue or organ includes the committed equivalent dose to that tissue or organ from internal radiation;
 - (c) “external radiation” means, in relation to a person, ionising radiation coming from outside the body of that person; and
 - (d) “internal radiation” means, in relation to a person, ionising radiation coming from inside the body of that person.
