

## SCHEDULE 16

### Potato brown rot

## PART A

### Special measures for the control of Potato brown rot

#### **Additional measures applicable in relation to units of protected crop production**

11. Where it is possible to replace all of the growing medium in a contaminated unit of protected crop production, no person may plant in the unit any potato tubers, plants or true seeds, tomato plants or seeds or other host plants of Potato brown rot without the written authorisation of an inspector.
