

SCHEDULE 6

Principles and purposes of emergency plans

PART 2

Purposes of emergency plans

2. Any person with responsibility for preparing an emergency plan under these Regulations shall ensure that the plan, if implemented, would fulfil the following purposes—

- (a) to reduce or stop the effects of the radiation emergency;
- (b) to reduce the exposure to individuals and to the environment resulting from the release of ionising radiation;
- (c) if necessary, to ensure that provision is made for the medical treatment of those affected by the radiation emergency; and
- (d) to prioritise the implementation of the plan in relation to any person exposed to a dose in excess of the reference levels set out in regulation 19.
