## SCHEDULE 3

### Overall and Specific Migration Testing Using Food Simulants

## PART 5

### Migration Test Conditions (Times and Temperatures)

#### **Special cases**

6. Where the carrying out of a migration test under contact conditions specified in the Table to this Part causes any physical or other change in the test specimen which does not occur under the worst foreseeable conditions of use of the plastic material or article being tested the migration test shall be carried out in the worst foreseeable conditions of use in which such physical or other change does not occur.
