

SCHEDULE

ENVIRONMENTAL REQUIREMENTS

PART 2

Protected properties

4. In this Part of this Schedule—

“acoustic glazing” means glazing which comprises—

- (a) two panes of glass which are respectively 10 millimetres and 6 millimetres thick and having a gap of 12 millimetres between each of those panes; or
- (b) two panes of glass one of which is 6 millimetres thick and the other being laminated glass which is 6.4 millimetres thick and having a gap of 12 millimetres between each of those panes; or
- (c) such other glazing as would have an equivalent noise attenuating effect.

“standard double glazing” means glazing which comprises two panes of glass which are both 4 millimetres thick and having a gap of 16 millimetres between each of those panes; and

“the protected properties” means the following properties situated within the village of Cairnryan and “protected property” means any one of the protected properties—
