EXPLANATORY NOTE

(This note is not part of the Regulations)

These Regulations further amend the Food Labelling Regulations 1996 (“the principal Regulations”) in so far as they apply in relation to Scotland. The principal Regulations extend to the whole of Great Britain.

These Regulations implement the amendment made to Commission Directive [2007/68/EC](#) by Commission Regulation (EC) No. 415/2009 (O.J. No. L 125, 21.05.2009, p.52). This Directive itself amends Annex IIIa to Directive [2000/13/EC](#) of the European Parliament and of the Council as regards certain food ingredients. The ingredients in question are those that are likely to cause an allergic reaction in some consumers.

These Regulations amend the principal Regulations in respect of the labelling requirements for foods containing allergenic ingredients, including labelling exemptions for certain processed forms of those ingredients, by extending from 31st May 2009 to 31st December 2010 the transitional period for egg-derived lysozyme and for albumin (produced from egg) or milk (casein) products when used as fining agents in wine, in respect of wines that are marked, labelled or sold before that date.

A regulatory impact assessment has not been prepared for this instrument as it has no impact on business or the public or third sectors.
