

SCHEDULE

GOOD AGRICULTURAL AND ENVIRONMENTAL CONDITION

PART III

Maintenance of soil structure

Appropriate machinery use

Machinery use for planting or sowing

- 9.—(1) A farmer must not carry out any cultivation using machinery if—
- (a) water is standing on the surface of the land; or
 - (b) the soil is saturated to the point where water is clearly visible when pressure equivalent to a footprint is applied.
- (2) In this paragraph, “cultivation” means cultivation to prepare for planting or sowing.
