

SCHEDULE 1

Regulation 2

Meaning of “event zone”

1. “Event zone” means any place within the shaded area bounded by a green line on a relevant map together with any pavement on each side of any road within that area, including the airspace above or below any place within the event zone.

2. All parts of a railway station (whether on, above or under the ground) are to be treated as being within the event zone if any part of the station is on or above the ground in the event zone.

3. Where a relevant map shows any part of an event zone to be bounded by a river, the boundary is to be the mean low water spring of that river.

4. In paragraphs 1 and 3, “relevant map” means a map bearing the name of an event zone, the title of these Regulations and a signature of a member of the staff of the Scottish Government, of which copies are set out in Schedule 3.
