SCHEDULE 1

Regulation 3(1)

LINES DIVIDING LANDWARD AREAS FROM SEAWARD AREAS

1. Except as provided by the four next following paragraphs, the lines dividing the mainland of Great Britain and islands adjacent thereto (other than the Orkney and Shetland Islands) and the waters adjacent to the mainland and such islands to be treated for the purposes of these Regulations as landward areas from the islands and waters to be treated for such purposes as seaward areas shall be the low water line along the coast of the mainland of Great Britain, the Isle of Wight, Anglesey and Holy Island.

2. The lines dividing landward areas from seaward areas at the estuaries, rivers, harbours, bays and other places specified in the second column of Table 1 of this Schedule shall be straight lines drawn between the pairs of points identified by the map references respectively specified in the third column of that Table, each such point being a point situate on the low water line on or adjacent to the feature respectively named in the fourth column of that Table.

3. The lines dividing landward areas from seaward areas between Cape Wrath and the Mull of Kintyre shall be a series of straight lines drawn so as to join successively, in the order in which they are there set out, the points identified by the map references specified in the second column of Table 2 of this Schedule, each such point being a point situate on the low water line on or adjacent to the feature, if any, named in the third column of that Table.

4. The lines dividing landward areas from seaward areas in the vicinity of the Pentland Firth and the Orkney Islands shall be a straight line drawn from the map reference point ND 310753, being a point situate on the low water line on or adjacent to the feature known as St. John's Point, to the map reference point ND 289809; thence a line running clockwise parallel with, and three nautical miles seaward of, the baselines from which the territorial sea adjacent to the Orkney Islands is measured to the map reference point ND 459711 and thence a straight line to the map reference point ND 407734, being a point situate on the low water line on or adjacent to the feature known as Duncansby Head.

5. Subject to the provisions of the last three foregoing paragraphs, the lines dividing landward areas from seaward areas at the mouths of rivers or estuaries shall be straight lines joining the points on the low water lines at either side of each such mouth.

6. The line dividing the Shetland Islands and the waters adjacent thereto to be treated for the purposes of these Regulations as landward areas from the areas to be treated for such purposes as seaward areas shall be a line parallel with, and three nautical miles seaward of, the baselines from which the breadth of the territorial sea adjacent to those Islands is measured:

Provided that Foula and Fair Isle and the waters adjacent to them shall be treated as seaward areas.

7. In this Schedule-

"low water line" means the line so marked on the Ordnance Survey maps on a scale of 1:25,000 in the edition for the areas to which they respectively relate last published prior to the date on which these Regulations are made, and any reference to a map reference point shall be construed as a reference to a point having that map reference on the National Grid for those Ordnance Survey maps; and "nautical miles" means international nautical miles of 1,852 metres.
