

SCHEDULE 4

REQUIREMENTS FOR DRINKING MILK

PART II

RAW MILK FOR HEAT-TREATMENT

1.—(1) Raw milk, at the time of its acceptance at a treatment establishment, unless treated within 4 hours of acceptance, shall be cooled to a temperature not exceeding 6°C and maintained at that temperature until heat-treated.

(2) Where raw cows' milk is not treated within 36 hours of acceptance at a treatment establishment, a further test shall be carried out on such milk before it is heat-treated. If it is found by means of a direct or indirect method that the plate count of that milk at 30°C exceeds 300,000 per ml, then such milk shall not be used for the production of heat-treated drinking milk.
