

## SCHEDULE 2

### PRODUCTION AND PLACING ON THE MARKET CONDITIONS FOR LIVE SHELLFISH

#### CHAPTER IV

#### CONDITIONS FOR THE APPROVAL OF DISPATCH OR PURIFICATION CENTRES

##### *Section III*

##### *Requirements for purification centres*

4. clean seawater or seawater cleaned by treatment must be used for purifying live bivalve molluscs; the distance between the seawater intake point and the waste water outlets must be sufficient to avoid contamination; if treatment of the seawater is necessary, the process shall be authorised once its effectiveness has been verified by the Ministers; water used to prepare seawater from its major constituent chemicals must be potable water;
