

SCHEDULE 3

PRODUCTION AND PLACING ON THE MARKET CONDITIONS FOR FISHERY PRODUCTS

CHAPTER IV

SPECIAL CONDITIONS FOR HANDLING FISHERY PRODUCTS ON SHORE

Section II

Conditions for frozen products

1. Plants must have—

- (a) freezing equipment sufficiently powerful to achieve a rapid reduction in the temperature so that the temperature laid down in these Regulations can be obtained in the product;
- (b) freezing equipment sufficiently powerful to keep products in storage rooms at a temperature not exceeding those laid down in these Regulations, whatever the ambient temperature may be,

however, for technical reasons related to the method of freezing and to the handling of such products, for whole fish frozen in brine and intended for canning, higher temperatures than those laid down in these Regulations are acceptable, although they may not exceed -9°C .
