EXPLANATORY NOTE

(This note is not part of the Order)

This Order authorises the use of specified rail vehicles forming Class 458 electrical multiple-units, although they do not conform with certain requirements of the Rail Vehicle Accessibility Regulations 1998 because:

- doorway warning sounds cannot be heard outside the vehicle;
- warnings are emitted whenever the passenger doors in the sides of the vehicles are closed;
- door controls are not positioned as required;
- internal door controls are not illuminated;
- the band of colour on the step-tread is too wide;
- there is no step illumination
- handrails at external doors are not positioned as required;
- the characters for internal visual announcements are smaller than required; and
- the toilet cubicle for disabled persons in wheelchairs does not meet the requirement that such a person may wash and dry his hands without moving from the toilet and the requirement that there must be sufficient space for a reference wheelchair in front of and beside the toilet.

It sets time limits on the authorisation and imposes conditions.
