The Radioactive Material (Road Transport) Regulations 2002

PART VI

REQUIREMENTS AND CONTROLS FOR TRANSPORT

Transport of empty packagings

42. An empty packaging that has previously contained radioactive material may be transported as an excepted package if (but only if)—

- (a) it is in a well maintained condition and is securely closed;
- (b) the outer surface of any uranium or thorium in its structure is covered with an inactive sheath made of metal or of some other substantial material;
- (c) the level of internal non-fixed contamination does not exceed 100 times the levels that are specified in paragraph (2)(a) of regulation 37 (requirements and controls for contamination and for leaking packages); and
- (d) any labels that may have been displayed on it in conformity with the labelling requirements of regulation 48 (responsibilities of consignors) are no longer visible.

Changes to legislation:

There are outstanding changes not yet made by the legislation.gov.uk editorial team to The Radioactive Material (Road Transport) Regulations 2002. Any changes that have already been made by the team appear in the content and are referenced with annotations.
