Status: This is the original version (as it was originally made).

SCHEDULE 2

Regulation 2(1)

Peak Sound Pressure Level

Peak sound pressure level, L_{Cpeak} , is expressed in decibels and is ascertained using the formula:

$$L_{\mathrm{Openix}} = 20 \log_{10} \left[\frac{P_{\mathrm{Openix}}}{\rho_0} \right]$$

where-

 p_{Cpeak} ; is the maximum value of the C-weighted sound pressure, in Pascals (Pa), to which a person is exposed during the working day; and p_0 is $20 \,\mu\text{Pa}$.
