2005 No. 1970

The Air Navigation Order 2005

PART 5

Operation of Aircraft

Passenger briefing by commander

53.—(1) Subject to paragraph (2), the commander of an aircraft registered in the United Kingdom shall take all reasonable steps to ensure—

- (a) before the aircraft takes off on any flight, that all passengers are made familiar with the position and method of use of emergency exits, safety belts (with diagonal shoulder strap where required to be carried), safety harnesses and (where required to be carried) oxygen equipment, lifejackets and the floor path lighting system and all other devices required by or under this Order and intended for use by passengers individually in the case of an emergency occurring to the aircraft; and
- (b) that in an emergency during a flight, all passengers are instructed in the emergency action which they should take.

(2) This article shall not apply to the commander of an aircraft registered in the United Kingdom in relation to a flight under and in accordance with the terms of a police air operator's certificate.
