

[^{F1}SCHEDULE 12

Monitoring of water bottled and labelled as “spring water” and bottled drinking water

Textual Amendments

- F1** Sch. 12 inserted (6.4.2018) by [The Natural Mineral Water, Spring Water and Bottled Drinking Water \(England\) \(Amendment\) Regulations 2018 \(S.I. 2018/352\)](#), reg. 1(1), **Sch. 2**

PART 2

General

Validation and documentation

16.—(1) A food authority must ensure that any analysis that it carries out for the purpose its monitoring obligations under regulation 16A, as read with this Schedule, is validated and documented in accordance with BS EN ISO/IEC 17025:2017 entitled “General requirements for the competence of testing and calibration laboratories” (ISBN 978 0 580 88466 5) published by the BSI on 31st December 2017 or another equivalent standard accepted at international level.

(2) But, in the case of the analysis of a sample for the purpose of the monitoring obligations under the provisions specified in sub-paragraph (3), it is sufficient if the laboratory at which the sample is analysed has a system of analytical quality control in place that is checked by the United Kingdom Accreditation Service from time to time.

(3) The provisions are those in—

- (a) paragraph 9, as read with Part 6 (radon),
- (b) paragraph 10, as read with Part 7 (tritium), and
- (c) paragraph 11, as read with Part 8 (indicative dose).]

Changes to legislation:

There are currently no known outstanding effects for the The Natural Mineral Water, Spring Water and Bottled Drinking Water (England) Regulations 2007, Paragraph 16.
