2008 No. 2349

The Nitrate Pollution Prevention Regulations 2008

PART 7

Storage of organic manure

Temporary field sites

- 32.**—(1) A temporary field site must not be—
- (a) in a field liable to flooding or becoming waterlogged;
 - (b) within 50 metres of a spring, well or borehole or within 10m of surface water or a land drain (other than a sealed impermeable pipe);
 - (c) located in any single position for more than 12 consecutive months;
 - (d) located in the same place as an earlier one constructed within the last two years.
- (2) Solid poultry manure that does not have bedding mixed into it and is stored on a temporary field site must be covered with an impermeable material.
