EXPLANATORY NOTE

(This note is not part of the Regulations)

These Regulations also include provision relating to ADR, RID and ADN. These are terms defined in the Table in regulation 2(5) of the 2009 Regulations and refer to the technical requirements (as revised or reissued) annexed to the international agreements governing the transport of dangerous goods by, respectively, road, rail and inland waterway. In particular these Regulations enable ADR and RID to be interpreted in such a way as to ensure that class 1 goods are classified by the GB competent authority or the competent authority of another party to ADR or RID.

The Regulations also give the Secretary of State for Energy and Climate Change certain responsibilities in relation to class 7 goods, and make the Secretary of State for Defence an enforcing authority. They insert a review clause into the 2009 Regulations and make a number of minor changes.

Regulation 3 amends the Table in regulation 2 of the 2009 Regulations by inserting new defined terms and updating the meaning of the Transportable Pressure Equipment Directive so it refers to the 2010 Directive.

(24) S.I. 2010/1554.
Regulation 4 amends regulation 3 of the 2009 Regulations in respect of the interpretation of ADR, RID and ADN for the purposes of those Regulations. A number of redundant provisions are removed and “EU” is substituted for “Communities” to reflect European institutional reform. References to “competent authority” are inserted in ADR and RID text relating to the classification of class 1 goods. This latter change allows for the revocation of the Classification and Labelling of Explosives Regulations 1983.

Regulation 5 amends regulation 11(3) of the 2009 Regulations to change the name of the document which sets out the exemptions.

Regulation 6 amends regulation 12 of the 2009 Regulations allowing the Secretary of State for Energy and Climate Change to issue authorisations in relation to the national carriage of class 7 goods.

Regulation 7 replaces regulation 19 (conformity assessment) in the 2009 Regulations with regulations 19 to 19F. Regulation 19 sets out the equipment to which the general and specific obligations apply. Regulation 19A sets outs the general obligations that apply where transportable pressure equipment is placed or made available on the market, put into service or used. Regulations 19B to 19F set out specific obligations on manufacturers, importers, distributors, owners and operators respectively.

Regulation 8 replaces regulation 20 (conformity assessment – national carriage), which is no longer allowed under the 2010 Directive, with a new regulation allowing a manufacturer to appoint an authorised representative to carry out some of its obligations and setting out the responsibilities of that authorised representative.

Regulations 9 and 10 amend regulations 21 and 22 of the 2009 Regulations to reflect the changes made by the 2010 Directive to the procedures for reassessment of conformity, and for periodic inspection and repeated use.

Regulation 11 amends regulation 25 of the 2009 Regulations making the Secretary of State for Energy and Climate Change a competent authority in relation to the carriage of class 7 goods, except for the register of driver training certificates.
