SCHEDULE 9

PARTICULARS TO BE INCLUDED IN A NOTIFICATION OF WELL OPERATIONS

10. Where a well operation is to be carried out from a non-production installation or a vessel (not being an installation)—

(a) particulars of—

- (i) the meteorological and oceanographic conditions to which that installation or, as the case may be, vessel may foreseeably be subjected;
- (ii) the depth of water; and
- (iii) the properties of the seabed and subsoil at the location at which the well operation will be carried out; and
- (b) a description of how the well operator and—
 - (i) the owner of the installation; or
 - (ii) the operator and owner of the vessel,

involved in the well operation will co-ordinate their management systems so as to reduce the risks from a major accident to comply with the relevant statutory provisions.
