

## SCHEDULE

### PART 2

Direct biophysical effects of exposure

Exposure limit values – non-thermal effects

#### Notes

- Note 2 to Table AL1 applies in relation to methods of determining exposure.

**Table ELV3 – Sensory effect ELVs for exposure to electromagnetic fields from 1 to 400 Hz**

<i>Frequency range</i>	<i>Sensory effect ELVs – internal electric field strength in the head (E) [<math>Vm^{-1}</math>]</i>
$1 \leq f < 10$ Hz	0.7/f
$10 \leq f < 25$ Hz	0.07
$25 \leq f \leq 400$ Hz	0.0028 f
