Technical specifications

Normal power recharging points for motor vehicles

1.—(1) An alternating current normal power recharging point for electric vehicles must be equipped for interoperability purposes with at least socket outlets or vehicle connectors of Type 2 as described in standard EN 62196-2(1).

(2) While maintaining the Type 2 compatibility, those socket outlets may be equipped with features such as mechanical shutters.

(1) “Plugs, socket-outlets, vehicle connectors and vehicle inlets. Conductive charging of electric vehicles. Dimensional compatibility and interchangeability requirements for a.c. pin and contact-tube accessories”. BS EN 62196-2:2017. ISBN 978 0 580 87759 9.
