CHAPTER 2

United Kingdom buffer rates for SRB institutions

The FPC framework

34G.—(1) The FPC must have a framework for systemic risk buffer rates in the United Kingdom established in accordance with this regulation (“the FPC framework”).

(2) The FPC framework must contain the following elements—

- (a) a set of criteria for assessing the extent to which the failure or distress of a SRB institution might pose a long term non-cyclical systemic or macro-prudential risk not covered by the capital requirements regulation;
 - (b) a methodology for measuring the criteria and giving a SRB institution a single score in relation to the criteria; and
 - (c) in relation to each score that a SRB institution may receive, a buffer rate that corresponds to the score.
- (3) In paragraph (2)(a)—
- (a) a SRB institution is in distress only if it experiences a significant deterioration in its financial situation;
 - (b) a long term non-cyclical systemic or macro-prudential risk means a risk of disruption to the financial system with the potential to have serious negative consequences for the financial system and the real economy in the United Kingdom.
- (4) In paragraph (2)(a) the criteria to be specified must each be—
- (a) measurable; and
 - (b) capable of being applied to SRB institutions on an individual basis, a sub-consolidated basis and a consolidated basis.
- (5) In paragraph (2)(c) the only buffer rates that the FPC may specify are 0%, 1%, 1.5%, 2%, 2.5% and 3%.
- (6) The way in which buffer rates correspond to scores in the FPC framework—
- (a) must be clear, precise and unambiguous,
 - (b) must ensure that a score corresponds to one buffer rate only,
 - (c) may not be expressed in terms of a discretion conferred on a person or body (including the FPC), and
 - (d) may be expressed by way of a formula, an algorithm, a graph or a table.

Determination by PRA of buffer rates for individual SRB institutions

34H.—(1) The PRA must, in relation to each SRB institution, determine—

- (a) whether or not to set a buffer rate for the institution; and
- (b) where it does set a buffer rate, the level of the rate,

by applying the steps set out in paragraph (2).

(2) The steps set out in this paragraph are—

Step 1 – determining level of consolidation

The PRA must choose one of the following bases on which to apply the criteria specified in the FPC framework to the SRB institution—

- (a) an individual basis;
- (b) a sub-consolidated basis; or
- (c) a consolidated basis.

Step 2 – deriving a framework buffer rate from the FPC framework

The PRA must derive a buffer rate from the FPC framework for the SRB institution (“a framework buffer rate”) by—

- (a) applying the methodology of the FPC framework to obtain a score for the SRB institution; and
- (b) ascertaining to what buffer rate the score corresponds under the FPC framework.

Step 3 – setting a buffer rate for SRB institution based on supervisory judgment

The PRA may, if it makes a sound supervisory judgment that it is appropriate to do so—

- (a) set a buffer rate for an SRB institution, even if it has derived a framework buffer rate for the institution of 0% under Step 2;
- (b) set a buffer rate for an SRB institution which is different to the framework buffer rate derived for the institution under Step 2; or
- (c) set no buffer rate for an SRB institution, even if it has derived a framework buffer rate for the institution of other than 0% under Step 2.

Where the PRA sets a buffer rate under sub-paragraph (a) or (b) of this Step the rate must be 1%, 1.5%, 2%, 2.5% or 3%.

Step 4 – setting a buffer rate for SRB institutions based on framework buffer rate

Unless the PRA exercises the discretion in Step 3—

- (a) where the PRA derives a framework buffer rate under Step 2 of 0% for the SRB institution, the PRA may not set a buffer rate for the institution; and
- (b) where the PRA derives a framework buffer rate under Step 2 other than 0% for the SRB institution, the PRA must set the rate so derived as the buffer rate for the institution.

CHAPTER 3

Third country buffer rates

Third country buffer rates: recognition

34I.—(1) In this Part, a “third country buffer rate” means—

- (a) in relation to an EEA state, a buffer rate set in accordance with Article 133 of the capital requirements directive as it has effect in EU law as amended from time to time, or if revoked, by its successor; or
- (b) in relation to a country other than the United Kingdom which is not an EEA state, a buffer rate set by the relevant authority of that country, that the PRA considers serves a similar purpose to the buffer rates that may be set in accordance with Article 133 of the capital requirements directive as it has effect in EU law as amended from time to time, or if revoked, by its successor.

(2) The PRA may decide to recognise a third country buffer rate (“a recognition decision”).

(3) A recognition decision may relate to all institutions or institutions of a specified description.

(4) The PRA may revoke a recognition decision.

Third country buffer rates: application to institutions

34J.—(1) This regulation applies when a recognition decision (within the meaning of regulation 34I(2)) has effect in relation to a third country.

(2) The PRA may require an institution which is a PRA-authorized person and which satisfies the condition in paragraph (4) to apply the third country buffer rate.

(3) The FCA may require an institution which is not a PRA-authorized person and which satisfies the condition in paragraph (4) to apply the third country buffer rate.

(4) The condition in this paragraph is that the institution has exposures located in the third country.

(5) The powers in paragraphs (2) and (3), in relation to a recognition decision which is limited to institutions of a specified description (in accordance with regulation 34I(3)), apply only to institutions falling within the description.

(6) Where an institution is required to apply a third country buffer rate under paragraph (2) or (3), the PRA or the FCA (as the case may be) must specify, to the relevant institution,

the basis to be applied in valuing exposures in accordance with Chapter 4 from one of the following bases—

- (a) an individual basis,
- (b) a sub-consolidated basis, or
- (c) a consolidated basis.

(7) Paragraph (6) does not apply to a Class B institution.

(8) The PRA may not require an SRB institution to apply a third country buffer rate under paragraph (2) if—

- (a) the PRA has set a buffer rate for the SRB institution under regulation 34H, and
- (b) the buffer rate set under regulation 34H is greater than the third country buffer rate.

(9) The FCA or the PRA may revoke a requirement imposed under paragraph (2) or (3).

CHAPTER 4

Date of application and calculation of systemic risk buffer

Date of application

34K.—(1) Where the PRA sets a buffer rate for an SRB institution under regulation 34H, the PRA must decide the date from which the SRB institution must apply that rate in the calculation of its systemic risk buffer.

(2) Where the PRA has set a buffer rate for an SRB institution under regulation 34H and determines that a buffer rate is no longer to be set for the institution under the regulation, the PRA must decide the date from which this takes effect.

(3) Where the relevant regulator decides that an institution must apply a third country buffer rate under regulation 34J, the relevant regulator must decide the date from which the institution must apply the buffer rate in the calculation of its systemic risk buffer.

(4) Where the relevant regulator revokes a requirement that an institution apply a third country buffer rate under regulation 34J, the relevant regulator must decide the date from which the institution must cease to apply the buffer rate in the calculation of its systemic risk buffer.

Calculation: Class A institutions

34L.—(1) The PRA must require a Class A institution to calculate its systemic risk buffer by applying the buffer rate set for it under regulation 34H to all its exposures.

(2) The PRA must require the institution, for the purposes of the calculation required under paragraph (1), to—

- (a) determine the value of its exposures by applying the level of consolidation selected by the PRA under Step 1 of regulation 34H(2), and
- (b) apply the buffer rate equally to all exposures, regardless of where they are located.

Calculation: Class B institutions

34M.—(1) The PRA must require a Class B institution to calculate its systemic risk buffer by—

- (a) applying the third country buffer rate to its exposures located within the third country, and
- (b) applying the buffer rate set for it under regulation 34H to all its other exposures.

(2) The PRA must require the institution, for the purposes of the calculation required under paragraph (1), to—

- (a) determine the value of its exposures by applying the level of consolidation selected by the PRA under Step 1 of regulation 34H(2), and
- (b) apply the buffer rate set for it under regulation 34H equally to all exposures other than exposures located within the third country, regardless of where they are located.

Calculation: Class C, Class D and Class E institutions

34N.—(1) The relevant regulator must require a Class C, Class D or Class E institution to calculate its systemic risk buffer by applying the third country buffer rate to the value of its exposures located within the third country.

(2) The relevant regulator must require the institution, for the purposes of the calculation required under paragraph (1), to determine the value of its exposures by applying the level of consolidation selected by the relevant regulator under regulation 34J(6).

CHAPTER 5

Notifications, Publication, Review and Appeals

Notification: recognition of third country buffer rate

34O. Where the PRA gives or revokes a recognition decision under regulation 34I, it must notify—

- (a) the FCA,
- (b) the authorities of the third country which are responsible for supervision of undertakings, and
- (c) if different, the authorities of the third country responsible for setting the buffer rate.

Publication: FPC framework

34P. The Bank must publish each element of the FPC framework set out in regulation 34G(2), together with the FPC’s justification for each element.

Publication: UK buffer rates

34Q.—(1) Where the PRA sets a buffer rate for an SRB institution under regulation 34H, the PRA must publish the following information—

- (a) the SRB institution to which the buffer rate applies,
- (b) the buffer rate,
- (c) the justification for setting the buffer rate,
- (d) the date from which the SRB institution must apply the buffer rate,
- (e) the level of consolidation to be used in the calculation of the systemic risk buffer (as determined under Step 1 of regulation 34H(2)), and
- (f) the fact that the systemic risk buffer applies to exposures located anywhere in the world (unless a third country buffer rate is applied to the SRB institution under regulation 34J).

(2) Where the PRA determines that a buffer rate is no longer to be set for an SRB institution under regulation 34H, the PRA must publish the following information—

- (a) the fact that the buffer rate is no longer set,
- (b) if applicable, the fact that the SRB institution is no longer required to maintain a systemic risk buffer,

(c) the justification for ceasing to set the buffer rate, and

(d) the date from which the SRB institution may cease to apply the buffer rate.

(3) A reference to the PRA's justification in paragraphs (1)(c) and (2)(c) includes the PRA's justification for doing anything under Step 3 of regulation 34H(2).

(4) The PRA must not publish information under paragraph (1)(c) or (2)(c) if publication might jeopardise the stability of the financial system.

Publication: third country buffer rates

34R.—(1) Where the PRA recognises a third country buffer rate under regulation 34I, it must publish—

(a) the buffer rate, and

(b) the justification for recognising the buffer rate.

(2) Where the relevant regulator requires an institution to apply a third country buffer rate under regulation 34J, it must publish—

(a) the date from which the institution must apply the third country buffer rate,

(b) the location of the exposures to which the third country buffer rate relates,

(c) the level of consolidation which applies in the calculation of the systemic risk buffer, and

(3) The PRA or the FCA (as the case may be) must not publish information under paragraph (1)(b) or (2)(d) if publication might jeopardise the stability of the financial system.

(4) Where the relevant regulator revokes a requirement that an institution apply a third country buffer rate under regulation 34J, it must publish—

(a) the fact that the requirement has been revoked,

(b) the justification for its decision to revoke the requirement, and

(c) the date from which the institution may cease to apply the third country buffer rate.
