Formal objections against UK Assessment Documents

1. Where the Secretary of State considers that a UK Assessment Document does not satisfy the demands to be met in relation to the basic requirements for construction works set out in Annex 1, the Secretary of State must decide, after consulting the responsible TAB, any other relevant TABs, and such other persons as the Secretary of State considers appropriate, to publish, not to publish, to publish with restriction, to maintain, to maintain with restriction or to withdraw the reference to the UK Assessment Document.

2. The Secretary of State must inform the responsible TAB and any other relevant TABs of the decision under paragraph 1 and may request the revision of the UK Assessment Document concerned.”.

2. Where the Secretary of State has established classes of performance in relation to the essential characteristics of construction products, a recognised standardisation body must use those classes in a standard prepared under Article 18A. A responsible TAB must where relevant use those classes in UK Assessment Documents.

Where classes of performance in relation to the essential characteristics of construction products are not established by the Secretary of State, they may be established by a recognised standardisation body in a standard prepared under Article 18A, on the basis of a revised standardisation mandate.

3. When provided for in the relevant standardisation mandate, a recognised standardisation body must establish in a standard prepared under Article 18A threshold levels in relation to essential characteristics and, when appropriate, for intended uses, to be fulfilled by construction products in the United Kingdom.

4. Where a recognised standardisation body has established classes of performance in a designated standard or a European standardisation body has established such classes in a harmonised standard which is a designated standard, a responsible TAB must use those classes in the UK Assessment Documents where they are relevant for the construction product.

When deemed appropriate, a responsible TAB may, with the agreement of the Secretary of State and after consulting such persons as it considers appropriate, establish in the UK Assessment Document classes of performance and threshold levels in relation to the essential characteristics of a construction product within its intended use as foreseen by the manufacturer.

5. The Secretary of State may make regulations, in accordance with Article 60, to establish conditions under which a construction product is to be deemed to satisfy a certain level or class of performance without testing or without further testing.

Where such conditions are not established by the Secretary of State, they may be established by a recognised standardisation body in a standard prepared under Article 18A, on the basis of a revised standardisation mandate.

6. When the Secretary of State has established classification systems in accordance with paragraph 1, any person may determine the levels or classes of performance to be respected by construction products in relation to their essential characteristics only in accordance with those classification systems.

7. A recognised standardisation body and a responsible TAB must respect the regulatory needs of the United Kingdom when determining threshold levels or classes of performance.”.

PROCEDURE FOR ADOPTING A UK ASSESSMENT DOCUMENT

Request for a UK Technical Assessment

1. When a manufacturer makes a request for a UK Technical Assessment to any TAB for a construction product, and after the manufacturer and the responsible TAB have signed an agreement of commercial secrecy and confidentiality, unless the manufacturer decides otherwise, the manufacturer must submit to the responsible TAB a technical file describing the product, its use as foreseen by the manufacturer and details of the factory production control the manufacturer intends to apply.

Requirements in relation to relevant TABs

2. For construction products referred to in Article 21(1)(c) for which there are other relevant TABs, the responsible TAB must within three weeks of the receipt of the technical file:

- (a) agree a work programme for the development of the UK Assessment Document with the relevant TABs;
- (b) establish a working group of the relevant TABs to develop the UK Assessment Document.

A representative from each relevant TAB must participate in the working group established by the responsible TAB.

Contract

3. For construction products referred to in Article 21(1)(c), within 1 month from the receipt of the technical file, a contract must be concluded between the manufacturer and the responsible TAB for the production of the UK Technical Assessment, defining the work programme for drawing up the UK Assessment Document, including:

- the organisation of work between any relevant TABs,
- if applicable, the composition of the working group referred to in section 2.

Work programme

4. After the conclusion of the contract with the manufacturer, the responsible TAB must inform the Secretary of State of the work programme for drawing up the UK Assessment Document and the schedule for its execution and indicate the assessment programme. This communication must take place within 3 months of receipt of the request for a UK Technical Assessment.

The draft UK Assessment Document

5. The responsible TAB must finalise a draft UK Assessment Document with the working group referred to in section 2 and must share this draft with the parties concerned within 6 months of the date the Secretary of State was informed of the work programme.

Secretary of State participation

Extension and delay

7. Any delay in relation to the time limits set in sections 1 to 5 in this Annex must be reported by the responsible TAB to the Secretary of State.

If an extension of the time limits for developing the UK Assessment Document can be justified, notably by the absence of a Secretary of State decision on the applicable system of assessment and verification of constancy of performance for the construction product or by the need to develop a new test method, the Secretary of State is to set an extended time limit.

Amendments and adoption of a UK Assessment Document

8. The responsible TAB must communicate the draft UK Assessment Document to the manufacturer. The manufacturer has 15 working days to provide representations to the responsible TAB. Thereafter, the responsible TAB must:

- (a) consider any representations from the manufacturer with the working group referred to in section 2 and agree any changes to the draft UK Assessment Document with that group;
- (b) if applicable, inform the manufacturer as to how the manufacturer's reactions have been taken into account;
- (c) adopt the draft UK Assessment Document; and
- (d) send a copy to the Secretary of State.

If, within 15 working days of receipt, the Secretary of State provides observations to the responsible TAB on the draft UK Assessment Document, the responsible TAB, after it and any relevant TABs have been given the opportunity to comment, must amend the draft accordingly and must send a copy of the adopted UK Assessment Document to the manufacturer and to the Secretary of State.

In this section, "working day" means any day other than:

- (a) Saturday or Sunday;
- (b) Christmas Day or Good Friday; or
