## SCHEDULE 1

Regulation 4

## New Annex 2 to the Phytosanitary Conditions Regulation

#### "ANNEX 2

## List of GB quarantine pests

Table of (	Table of Contents				
Part A: P	ests not known to occur in Great Britain				
A.	Bacteria				
B.	Fungi and oomycetes				
C.	Insects and mites				
D.	Nematodes				
E.	Parasitic plants				
F.	Viruses, viroids and phytoplasmas				
Part B: P	ests known to occur in Great Britain				
A.	Bacteria				
B.	Fungi and oomycetes				
C.	Nematodes				
D.	Viruses, viroids and phytoplasmas				

## PART A

## Pests not known to occur in Great Britain

## GB quarantine pests and their EPPO codes

## A. Bacteria

- 1. Clavibacter sepedonicus (Spieckermann & Kotthoff) Li et al. [CORBSE]
- 2. Curtobacterium flaccumfaciens pv. flaccumfaciens (Hedges) Collins and Jones [CORBFL]
- 3. Pantoea stewartii subsp. stewartii (Smith) Mergaert, Verdonck & Kersters [ERWIST]
- 4. *Pseudomonas syringae* pv. *actinidiae* Takikawa, Serizawa, Ichikawa, Tsuyumu & Goto [PSDMAK]
- 5. *Pseudomonas syringae* pv. *persicae* (Prunier, Luisetti &. Gardan) Young, Dye & Wilkie [PSDMPE]
- 6. Ralstonia pseudosolanacearum Safni et al. [RALSPS]
- 7. Ralstonia syzygii subsp. celebesensis Safni et al. [RALSSC]
- 8. Ralstonia syzygii subsp. indonesiensis Safni et al. [RALSSI]
- 9. Xanthomonas arboricola pv. pruni (Smith) Vauterin et al. [XANTPR]

- 10. *Xylella fastidiosa* (Wells et al.) [XYLEFA]
- 11. *Xylophilus ampelinus* (Panagopoulos) Willems, Gillis, Kersters, van den Broeke & De Ley [XANTAM]

## B. Fungi and oomycetes

- 1. Anisogramma anomala (Peck) E. Müller [CRSPAN]
- 2. Apiosporina morbosa (Schweinitz) von Arx [DIBOMO]
- 3 Atropellis apiculata M.L. Lohman, E.K. Cash & R.W. Davidson [ATRPAP]
- 4. *Atropellis pinicola* Zeller & Goodding [ATRPPC]
- 5. Atropellis piniphila (Weir) Lohmann & Cash [ATRPPP]
- 6. Atropellis tingens Lohman & Cash [ATRPTI]
- 7. *Botryosphaeria laricina* (Sawada) Shang [GUIGLA]
- 8. *Botryosphaeria kuwatsukai* (Hara) G.Y. Sun and E. Tanaka [PHYOPI]
- 9. Bretziella fagacearum Z.W. de Beer, Marincowitz, T.A. Duong & M.J. Wingfield [CERAFA]
- 10. Ceratocystis platani (J. M. Walter) Engelbr. & T. C. Harr [CERAFP]
- 11. *Chrysomyxa arctostaphyli* Dietel [CHMYAR]
- 12. *Coniferiporia sulphurascens* (Pilát) L.W. Zhou & Y.C. Dai [PHELSU]
- 13. *Coniferiporia weirii* (Murrill) L.W. Zhou & Y.C. Dai [INONWE]
- 14. *Cronartium* spp. Fries [1CRONG], except *Cronartium gentianeum* Thümen [CRONGE], *Cronartium pini* (Willdenow) Jørstad [ENDCPI] and *Cronartium ribicola* Fischer [CRONRI].
- 15. *Cryphonectria parasitica* (Murrill) Barr [ENDOPA]
- 16. Davidsoniella virescens (R.W. Davidson) Z.W. de Beer, T.A. Duong & M.J. Wingfield [CERAVI]
- 17. Diaporthe vaccinii Shear [DIAPVA]
- 18. *Dothistroma pini* Hulbary [DOTSPI]
- 19. Fusarium circinatum Nirenberg & O'Donnell [GIBBCI]
- 20. *Geosmithia morbida* Kolarík, Freeland, Utley & Tisserat [GEOHMO]
- 21. *Gymnosporangium* spp. [1GYMNG], except:

Gymnosporangium amelanchieris E. Fisch. ex F. Kern [GYMNAM], Gymnosporangium atlanticum Guyot & Malençon [GYMNAT], Gymnosporangium clavariiforme (Wulfen) DC [GYMNCF], Gymnosporangium confusum Plowright [GYMNCO], Gymnosporangium cornutum Arthur ex F. Kern [GYMNCR], Gymnosporangium fusisporum E. Fisch. [GYMNFS], Gymnosporangium gaeumannii H. Zogg [GYMNGA], Gymnosporangium gracile Pat. [GYMNGR], Gymnosporangium minus Crowell [GYMNMI], Gymnosporangium orientale P. Syd. & Syd. [GYMNOR], Gymnosporangium sabinae (Dickson) G. Winter [GYMNFU], Gymnosporangium torminali-juniperini E. Fisch. [GYMNTJ], Gymnosporangium tremelloides R. Hartig [GYMNTR]

- 22. Lecanosticta acicola (von Thümen) Sydow [SCIRAC]
- 23. *Melampsora farlowii* (Arthur) Davis [MELMFA]
- 24. *Melampsora medusae* f. sp. tremuloidis Shain [MELMMT]
- 25. *Mycodiella laricis-leptolepidis* (Kaz. Itô, K. Satô & M. Ota) Crous [MYCOLL]
- 26. *Phoma andina* Turkensteen [PHOMAN]
- 27. Phyllosticta solitaria Ellis & Everhart [PHYSSL]
- 28. *Phymatotrichopsis omnivora* (Duggar) Hennebert [PHMPOM]
- 29. *Phytophthora ramorum* (non-European isolates) Werres, De Cock & Man in 't Veld [PHYTRA]
- 30. Pseudocercospora pini-densiflorae (Hori & Nambu) Deighton [CERSPD]
- 31. Puccinia pittieriana Hennings [PUCCPT]
- 32. *Septoria malagutii* E.T. Cline [SEPTLM]
- 33. Sphaerulina musiva (Peck) Quaedvl, Verkley & Crous. [MYCOPP]
- 34. *Stegophora ulmea* (Fr.) Syd. & P. Syd [GNOMUL]
- 35. *Thecaphora solani* (Thirumulachar & O'Brien) Mordue [THPHSO]
- 36. *Tilletia indica* Mitra [NEOVIN]

## C. Insects and mites

- 1. Acleris gloverana (Walsingham) [ACLRGL]
- 2. Acleris issikii Oku [ACLRIS]
- 3. *Acleris minuta* (Robinson) [ACLRMI]
- 4. Acleris nishidai Brown [ACLRNI]
- 5. *Acleris nivisellana* (Walsingham) [ACLRNV]
- 6. *Acleris robinsoniana* (Forbes) [ACLRRO]
- 7. *Acleris semipurpurana* (Kearfott) [CROISE]
- 8. *Acleris senescens* (Zeller) [ACLRSE]
- 9. *Acleris variana* (Fernald) [ACLRVA]
- 10. Acrobasis pyrivorella (Matsumura) [NUMOPI]
- 11. *Agrilus anxius* Gory [AGRLAX]
- 12. Agrilus planipennis Fairmaire [AGRLPL]
- 13. Aleurocanthus spiniferus (Quaintance) [ALECSN]
- 14. *Anoplophora chinensis* (Forster) [ANOLCN]
- 15. Anoplophora glabripennis (Motschulsky) [ANOLGL]
- 16. Anthonomus bisignifer Schenkling [ANTHBI]
- 17. Anthonomus eugenii Cano [ANTHEU]
- 18. Anthonomus quadrigibbus Say [TACYQU]
- 19. Anthonomus signatus Say [ANTHSI]

- 20. *Aromia bungii* (Faldermann) [AROMBU]
- 21. *Arrhenodes minutus* Drury [ARRHMI]
- 22. *Aschistonyx eppoi* Inouye [ASCXEP]
- 23. Bactericera cockerelli (Sulc.) [PARZCO]
- 24. Bactrocera latifrons (Hendal) [DACULA]
- 25. Bactrocera tau (Walker) [BCTRTA]
- 26. Bactrocera tryoni (Froggatt) [DACUTR]
- 27. *Bemisia tabaci* (Gennadius). [BEMITA]
- 28. Carposina sasakii Matsumara [CARSSA]
- 29. Choristoneura biennis Freeman [CHONBI]
- 30. Choristoneura carnana (Barnes & Busck) [CHONCA]
- 31. *Choristoneura conflictana* (Walker) [ARCHCO]
- 32. *Choristoneura fumiferana* (Clemens) [CHONFU]
- 33. *Choristoneura lambertiana* (Busck) [TORTLA]
- 34. *Choristoneura occidentalis* (Walsingham) [CHONOC]
- 35. *Choristoneura orae* Freeman [CHONOR]
- 36. *Choristoneura parallela* (Robinson) [CHONPA]
- 37. *Choristoneura pinus pinus* Freeman [CHONPI]
- 38. *Choristoneura retiniana* (Walsingham) [CHONRE]
- 39. *Choristoneura rosaceana* (Harris) [CHONRO]
- 40. *Cicadellidae* (non-European) [1CICDF] known to be vector of *Xylella fastidiosa*, such as:
  - Carneocephala fulgida (Nottingham) [CARNFU],
  - Draeculacephala minerva Ball [DRAEMI],
  - Graphocephala atropunctata (Signoret) [GRCPAT],
  - Homalodisca vitripennis (Germar) [HOMLTR]
- 41. *Circulifer tenellus* (Baker) [CICTA]
- 42. *Conotrachelus nenuphar* (Herbst) [CONHNE]
- 43. Dacus ciliatus Loew [DACUCI]
- 44. Dacus frontalis Becker [DACUFR]
- 45. Dacus punctatifrons Karsch [DACUPU]
- 46. *Dendrolimus sibiricus* Chetverikov [DENDSI]
- 47. *Diabrotica barberi* Smith and Lawrence [DIABLO]
- 48. Diabrotica undecimpunctata howardi Barber [DIABUH]
- 49. Diabrotica undecimpunctata undecimpunctata Mannerheim [DIABUN]
- 50. Diabrotica virgifera zeae Krysan & Smith [DIABVZ]
- 51. Eotetranychus lewisi (McGregor) [EOTELE]

- 52. *Epitrix cucumeris* (Harris) [EPIXCU]
- 53. *Epitrix papa* (Orlova-Bienkowskaja) [EPIXPP]
- 54. Epitrix subcrinita (Leconte) [EPIXSU]
- 55. Epitrix tuberis Gentner [EPIXTU]
- 56. Euphranta canadensis (Loew) [EPOCCA]
- 57. Euphranta japonica (Ito) [RHACJA]
- 58. Exomala orientalis (Waterhouse) [ANMLOR]
- 59. *Grapholita inopinata* (Heinrich) [CYDIIN]
- 60. Grapholita packardi Zeller [LASPPA]
- 61. *Grapholita prunivora* (Walsh) [LASPPR]
- 62. Haplaxius crudus (van Duzee) [MYNDCR]
- 63. Helicoverpa armigera (Hübner) [HELIAR]
- 64. Helicoverpa assulta (Guenée) [HELIAS]
- 65. *Helicoverpa zea* (Boddie)[HELIZE]
- 66. *Ips amitinus* (Eichhoff) [IPSXAM]
- 67. *Ips duplicatus* (Sahlberg) [IPSXDU]
- 68. *Ips typographus* (L.) [IPSXTY]
- 69. Keiferia lycopersicella (Walsingham) [GNORLY]
- 70. Leptinotarsa decemlineata Say [LPTNDE]
- 71. Lopholeucaspis japonica (Cockerell) [LOPLJA]
- 72. *Liriomyza huidobrensis* (Blanchard) [LIRIHU]
- 73. *Liriomyza sativae* Blanchard [LIRISA]
- 74. *Liriomyza trifolii* (Burgess) [LIRITR]
- 75. *Listronotus bonariensis* (Kuschel) [HYROBO]
- 76. *Margarodes*, non-European species [1MARGG], such as:
  - Margarodes prieskaensis (Jakubski) [MARGPR],
  - Margarodes vitis (Philippi) [MARGVI],
  - Margarodes vredendalensis de Klerk [MARGVR]
- 77. *Monochamus* spp. Dejean [1MONCG]
- 78. *Myiopardalis pardalina* (Bigot) [CARYPA]
- 79. Naupactus leucoloma Boheman [GRAGLE]
- 80. *Neoceratitis cyanescens* (Bezzi) [CERTCY]
- 81. Nemorimyza maculosa (Malloch) [AMAZMA]
- 82. Neoleucinodes elegantalis (Guenée) [NEOLEL]
- 83. *Oemona hirta* (Fabricius) [OEMOHI]
- 84. *Oligonychus perditus* Pritchard and Baker [OLIGPD]

- 85. *Paysandisia archon* (Burmeister) [PAYSAR]
- 86. *Phyllocoptes fructiphilus* Keifer [PHYCFR]
- 87. Pissodes cibriani O'Brien [PISOCI]
- 88. *Pissodes fasciatus* Leconte [PISOFA]
- 89. *Pissodes nemorensis* Germar [PISONE]
- 90. *Pissodes nitidus* Roelofs [PISONI]
- 91. Pissodes punctatus Langor & Zhang [PISOPU]
- 92. Pissodes strobi (Peck) [PISOST]
- 93. Pissodes terminalis Hopping [PISOTE]
- 94. Pissodes yunnanensis Langor & Zhang [PISOYU]
- 95. Pissodes zitacuarense Sleeper [PISOZI]
- 96. *Pityophthorus juglandis* Blackman [PITOJU]
- 97. Polygraphus proximus Blandford [POLGPR]
- 98. *Popillia japonica* Newman [POPIJA]
- 99. *Premnotrypes spp.* Pierce (non-European) [1PREMG]
- 100. Pseudopityophthorus minutissimus (Zimmermann) [PSDPMI]
- 101. Pseudopityophthorus pruinosus (Eichhoff) [PSDPPR]
- 102. Rhagoletis fausta (Osten-Sacken) [RHAGFA];
- 103. Rhagoletis indifferens Curran [RHAGIN];
- 104. *Rhagoletis mendax* Curran [RHAGME];
- 105. Rhagoletis pomonella (Walsh) [RHAGPO];
- 106. Rhagoletis ribicola Doane [RHAGRI];
- 107. Rhagoletis suavis (Loew) [RHAGSU];
- 108. Rhizoecus hibisci Kawai and Takagi [RHIOHI]
- 109. Rhynchophorus palmarum (L.) [RHYCPA]
- 110. Rhynchophorus ferrugineus (Olivier) [RHYCFE]
- 111. Saperda candida Fabricius [SAPECN]
- 112. Scirtothrips aurantii Faure [SCITAU]
- 113. *Scirtothrips citri* (Moulton) [SCITCI]
- 114. Scirtothrips dorsalis Hood [SCITDO]
- 115. *Scolytidae* spp. (non-European) [1SCOLF]
- 116. Spodoptera eridania (Cramer) [PRODER]
- 117. Spodoptera frugiperda (Smith) [LAPHFR]
- 118. Spodoptera littoralis (Boisduval) [SPODLI]
- 119. *Spodoptera litura* (Fabricus) [PRODLI]

- 120. Strauzia longipennis (Wiedemann) [STRALO]
- 121. Tecia solanivora (Povolný) [TECASO]
- 122. Thaumatotibia leucotreta (Meyrick) [ARGPLE]
- 123. Thaumetopoea pityocampa Denis & Schiffermüller [THAUPI]
- 124. Thrips palmi Karny [THRIPL]
- 125. Zeugodacus cucumis (French) [DACUCM]
- 126. Zeugodacus cucurbitae (Coquillett) [DACUCU]

## D. Nematodes

- 1. Aphelenchoides besseyi Christie [APLOBE]
- 2. Bursaphelenchus xylophilus (Steiner and Bührer) Nickle [BURSXY]
- 3. Globodera pallida (Stone) Behrens [HETDPA] (Non-European Strains)
- 4. Globodera rostochiensis (Wollenweber) Behrens [HETDRO] (Non-European Strains)
- 5. *Hirschmanniella* spp., Luc & Goodey [1HIRSG], except:
  - Hirschmanniella behningi Micoletzky [HIRSBE],
  - Hirschmanniella gracilis (de Man) Luc & Goodey [HIRSGR],
  - Hirschmanniella halophila Sturhan & Hallman [HIRSHA],
  - Hirschmanniella loofi Sher [HIRSLO] and
  - Hirschmanniella zostericola Allgén [HIRSZO]
- 6. Longidorus diadecturus Eveleigh and Allen [LONGDI]
- 7. *Meloidogyne chitwoodi* Golden *et al.* [MELGCH]
- 8. *Nacobbus aberrans* (Thorne) Thorne and Allen [NACOBA]
- 9. *Xiphinema americanum sensu stricto* Cobb [XIPHAA]
- 10. *Xiphinema bricolense* Ebsary, Vrain & Graham [XIPHBC]
- 11. Xiphinema californicum Lamberti & Bleve-Zacheo [XIPHCA]
- 12. Xiphinema neoamericanum Saxena, Chhabra & Joshi [XIPHNA]
- 13. *Xiphinema intermedium* Lamberti & Bleve-Zacheo [XIPHIM]
- 14. *Xiphinema rivesi* (non-European populations) Dalmasso [XIPHRI]
- 15. *Xiphinema ta rjanense* Lamberti & Bleve-Zacheo [XIPHTA]

## E. Parasitic plants

- 1. *Arceuthobium* spp. [1AREG], except:
  - Arceuthobium azoricum Wiens & Hawksworth [AREAZ],
  - Arceuthobium gambyi Fridl [AREGA] and
  - Arceuthobium oxycedri (de Candolle) Marschall von Bieberstein [AREOX]

## F. Viruses, viroids and phytoplasmas

- 1. Beet curly top virus [BCTV00]
- 2. Begomoviruses [1BEGOG]
- 3. Blueberry scorch virus [BLSCV0]
- 4. Blueberry shoestring virus [BSSV00]

- 5. *Candidatus* Phytoplasma 'aurantifolia' Zreik, Bové & Garnier [PHYPAF]
- 6. *Candidatus* Phytoplasma 'mali' Seemüller & Schneider [PHYPMA]
- 7. *Candidatus* Phytoplasma 'pruni' Davis, Zhao, Dally, Lee, Jomantiene & Douglas [PHYPPN]
- 8. *Candidatus* Phytoplasma 'solani' Quaglino, Zhao, Casati, Bulgari, Bianco, Wei & Davis [PHYPSO]
- 9. *Candidatus* Phytoplasma 'ulmi' Lee, Martini, Marcone & Zhu [PHYPUL]
- 10. Chrysanthemum stem necrosis virus [CSNV00]
- 11. Coconut lethal yellowing phytoplasma [PHYP56]
- 12. Cowpea mild mottle virus [CPMMV0]
- 13. Cucumber vein yellowing virus [CVYV00]
- 14. Cucurbit yellow stunting disorder virus [CYSDV0]
- 15. Grapevine flavescence dorée phytoplasma [PHYP64]
- 16. Lettuce infectious yellows virus [LIYV00]
- 17. Melon yellowing-associated virus [MYAV00]
- 18. Potato viruses, viroids and phytoplasmas, such as:
  - Andean potato latent virus [APLV00],
  - Andean potato mild mosaic virus [APMMV0],
  - Andean potato mottle virus [APMOV0],
  - Arracacha virus B, oca strain [AVBO00],
  - Potato black ringspot virus [PBRSV0],
  - Potato yellowing virus [PYV000],
  - Potato yellow vein virus [PYVV00],
  - Potato virus T [PVT000],
  - Non-European isolates of potato viruses A, M, S, V, X and Y (including Yo, Yn and Yc) and Potato leafroll virus [PVA000, PVM000, PVS000, PVV000, PVX000 and PVY000 (including PVYO00, PVYN00, PVYC00)] and [PLRV00]
- 19. Rose Rosette virus [RRV000]
- 20. Strawberry vein banding virus [SVBV00]
- 21. Squash vein yellowing virus [SQVYVX]
- 22. Sweet potato chlorotic stunt virus [SPCSV0]
- 23. Sweet potato mild mottle virus [SPMMV0]
- 24. Tobacco ringspot virus [TRSV00]
- 25. Tobacco streak virus black raspberry latent strain [TSVBL0]
- 26. Tomato brown rugose fruit virus [TOBRFV]
- 27. Tomato chocolate virus [TOCHV0]
- 28. Tomato leaf curl New Delhi virus [TOLCND]
- 29. Tomato marchitez virus [TOANV0]
- 30. Tomato mild mottle virus [TOMMOV]

- 31. Viruses, viroids and phytoplasmas of *Cydonia* Mill., *Fragaria* L., *Malus* Mill., *Prunus* L., *Pyrus* L., *Ribes* L., *Rubus* L. and *Vitis* L., such as:
  - Blueberry leaf mottle virus [BLMOV0],
  - Candidatus Phytoplasma australiense Davis, Gillaspie, Vidaver & Harris [PHYPAU],
  - *Candidatus* Phytoplasma *phoenicium* Verdin, Salar, Danet, Choueiri, Jreijiri, El Zammar, Gélie, Bové & Garnier [PHYPPH],
  - Cherry rasp leaf virus [CRLV00],
  - Grapevine ajinashika virus [GAV000],
  - Peach mosaic virus [PCMV00],
  - Peach rosette mosaic virus [PRMV00],
  - American plum line pattern virus [APLPV0],
  - Raspberry leaf curl virus [RLCV00],
  - Strawberry witches' broom phytoplasma [SYWB00],
  - Non-European viruses, viroids and phytoplasmas of *Cydonia* Mill., *Fragaria* L.,
     Malus Mill., *Prunus* L., *Pyrus* L., *Ribes* L., *Rubus* L. and *Vitis* L.

## PART B

## Pests known to occur in Great Britain

## GB quarantine pests and their EPPO codes

## A. Bacteria

1. Ralstonia solanacearum (Smith) Yabuuchi et al. emend. Safni et al. [RALSSL]

## B. Fungi and oomycetes

1. Synchytrium endobioticum (Schilbersky) Percival [SYNCEN]

## C. Nematodes

- 1. Globodera pallida (Stone) Behrens [HETDPA] (European Strains)
- 2. Globodera rostochiensis (Wollenweber) Behrens [HETDRO] (European Strains)

## D. Viruses, viroids and phytoplasmas

1. Candidatus Phytoplasma 'prunorum' Seemüller & Schneider [PHYPPR]"

#### SCHEDULE 2

Regulation 5

New Annex 2A to the Phytosanitary Conditions Regulation

"ANNEX 2A

List of provisional GB quarantine pests

## Provisional GB quarantine pests and their EPPO codes

## A. Fungi and oomycetes

1. *Alternaria mali* Roberts [ALTEMA]

- 2. *Heterobasidion irregulare* Garbelotto & Otrosina [HETEIR]
- 3. *Neocosmospora euwallaceae* (S. Freeman, Z. Mendel, T. Aoki & O'Donnell) Sandoval-Denis, L. Lombard & Crous [FUSAEW]
- 4. *Phytophthora kernoviae* Brasier, Beales & S.A. Kirk [PHYTKE]
- 5. Phytophthora ramorum (European isolates) Werres, De Cock & Man in 't Veld [PHYTRA]
- 6. *Thekopsora minima* (Arthur) Sydow & P. Sydow [THEKMI]

## B. Insect and mites

- 1. Agrilus fleischeri Obenberger [AGRLFL]
- 2. Agrilus bilineatus (Weber) [AGRLBL]
- 3. *Ceratothripoides brunneus* Bagnall [CRTZBR]
- 4. *Ceratothripoides claratris* (Shumsher) [CRTZCL
- 5. Euwallacea fornicatus senso lato (Eichhoff) [XYLBFO]
- 6. Neocerambyx raddei (Blessig) [MALLRA]
- 7. Platynota stultana Walsingham [PLAAST]
- 8. *Prodiplosis longifila* Gagné [PRDILO]
- 9. Scaphoideus luteolus van Duzee [SCAPLU]
- 10. Scaphoideus titanus Ball [SCAPLI]
- 11. Scolytus morawitzi Semenov [SCOLMO]
- 12. Tetranychus evansi Baker & Pritchard [TETREV]
- 13. Thaumetopoea pinivora (Treitschke)[THAUPV]
- 14. Trialeurodes abutiloneus Haldeman [TRIAAB]
- 15. *Toumeyella parvicornis* (Cockerell)[TOUMPA]
- 16. *Xyleborus glabratus* Eichhoff [XYLBGR]
- 17. *Xylotrechus* spp. Chevrolat [1XYLOG]

## C. Viruses, viroids and phytoplasmas

- 1. Apple dimple fruit viroid [ADFVD0]
- 2. Citrus exocortis viroid [CEVD00]
- 3. Columnea latent viroid [CLVD00]
- 4. Pepper chat fruit viroid [PCFVD0]
- 5. Tomato chlorosis virus [TOCV00]
- 6. Tomato infectious chlorosis virus [TICV00]
- 7. Tomato planta macho viroid [TPMVD0]
- 8. Tomato torrado virus [TOTV00]
- 9. Tomato yellow leaf curl Sardinia virus [TYLCSV]
- 10. Tomato yellow leaf curl virus [TYLCV0]"

## SCHEDULE 3

Regulation 6

## New Annex 3 to the Phytosanitary Conditions Regulation

## "ANNEX 3

# List of PFA quarantine pests and GB pest-free areas

	(1)	(2)
	PFA quarantine pest (with EPPO code)	Description of GB pest-free area
1.	Dendroctonus micans Kugelan [DENCMI]	The eastern boundary for the pest-free area runs from Dumbarton along the A82 to Crianlarich. From Crianlarich the boundary continues along the A82 to Loch Tulla and then it follows the railway line from Loch Tulla to Rannoch Station, to Tulloch Station to Roybridge Station. It then follows the C road by the river Roy up to Brae Roy Lodge, following the River Turret then cutting across the watershed following the Allt an t-Sidhean stream to the A82 at Laggan and then to Invergarry where it follows the A87 to the Kyle of Lochalsh and the islands of Skye, Mull, Jura, Arran, Scarba, Seil, Luing, Shuna, Torsa, Ulva, Gometra, Kerrera, Lismore and Eilean Shona
2.	Ips cembrae Heer [IPSXCE]	The eastern boundary for the pest-free area runs from Dumbarton along the A82 to Crianlarich. From Crianlarich the boundary continues along the A82 to Loch Tulla and then it follows the railway line from Loch Tulla to Rannoch Station, to Tulloch Station to Roybridge Station. It then follows the C road by the river Roy up to Brae Roy Lodge, following the River Turret then cutting across the watershed following the Allt an t-Sidhean stream to the A82 at Laggan and then to Invergarry where it follows the A87 to the Kyle of Lochalsh and the islands of Skye, Mull, Jura, Arran, Scarba, Seil, Luing, Shuna, Torsa, Ulva, Gometra, Kerrera, Lismore and Eilean Shona
3.	Ips sexdentatus Börner [IPSXSE]	The eastern boundary for the pest-free area runs from Dumbarton along the A82 to Crianlarich. From Crianlarich the boundary continues along the A82 to Loch Tulla and then it follows the railway line from Loch Tulla to Rannoch Station, to Tulloch Station to Roybridge Station. It then follows the C road by the river Roy up to Brae Roy Lodge, following the River Turret then cutting across the watershed following the Allt an t-Sidhean stream to the A82 at Laggan and then to

Invergarry where it follows the A87 to the Kyle

(1) (2) Description of GB pest-free area PFA quarantine pest (with EPPO of Lochalsh and the islands of Skye, Mull, Jura, Arran, Scarba, Seil, Luing, Shuna, Torsa, Ulva, Gometra, Kerrera, Lismore and Eilean Shona Great Britain (excluding the local authority 4. ## SCHEDULE 4

Regulation 7

New Annex 4 to the Phytosanitary Conditions Regulation

## "ANNEX 4

List of GB regulated non-quarantine pests and their respective plants for planting In this Annex, 'RNQPs' means GB regulated non-quarantine pests.

## **Table of Contents**

Part A: RNQPs concerning fodder plant seed

Part B: RNQPs concerning vine propagating material

Status: This is the original version (as it was originally made).

Part C: RNQPs concerning propagating material of ornamental plants and other plants for planting intended for ornamental purposes

Part D: RNQPs concerning forest reproductive material, other than seeds

Part E: RNQPs concerning vegetable seed

Part F: RNQPs concerning seed potatoes

Part G: RNQPs concerning seed of oil and fibre plants

Part H: RNQPs concerning vegetable propagating and planting material, other than seeds

Part I: RNQPs concerning fruit propagating material and fruit plants intended for fruit production

Part J: RNQPs concerning seeds of Solanum tuberosum

Part K: RNQPs concerning plants for planting of *Humulus lupulus*, other than seeds

PART A
RNQPs concerning fodder plant seed

(1)	(2)	(3)	(4)	(5)
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	· ·	Thresholds for basic seed	Thresholds certified seed
Clavibacter michiganensis ssp. insidiosus (McCulloch 1925) Davis et al. [CORBIN]	Medicago sativa L.	0%	0%	0%
Ditylenchus dipsaci (Kuehn) Filipjev [DITYDI]	Medicago sativa L.	0%	0%	0%

PART B

RNQPs concerning vine propagating material

Insects and mites			
(1)	(2)	(3)	(4)
RNQPs or symptoms caused by RNQPs	Plants for planting other than seeds (genus or species)	Thresholds for initial propagating material, basic propagating material and certified material	Thresholds for standard material

Daktulosphaira vitifoliae F [VITEVI]	itch	Non-grafted Vitis vinifera L.	0%	0%
Daktulosphaira vitifoliae F [VITEVI]	itch	Vitis L. other than non-grafted Vitis vinifera L.	Practically free	Practically free
Viruses, viroids, vi	rus-	like diseases and phytop	lasmas	
(1)		(2)	(3)	(4)
RNQPs or symptoms caused by RNQPs	S	Plants for planting other than seeds (genus or species)	Thresholds for initial propagating material, basic propagating material and certified material	Thresholds for standard material
Arabis mosaic v [ARMV00]	irus	Vitis L.	0%	0%
Grapevine fanleaf v [GFLV00]	irus	Vitis L.	0%	0%
Grapevine fleck v [GFKV00]	irus	Rootstocks of <i>Vitis</i> spp. and their hybrids, except <i>Vitis vinifera</i> L.		Not applicable
Grapevine leaf associated virus [GLRAV1]	froll 1	Vitis L.	0%	0%
Grapevine leaf associated virus [GLRAV3]	froll 3	Vitis L.	0%	0%

# PART C

RNQPs concerning propagating material of ornamental plants and other plants for planting intended for ornamental purposes

Bacteria		
(1)	(2)	(3)
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Thresholds for the propagating material of ornamental plants concerned and other plants for planting intended for ornamental purposes

Erwinia amylovora (Burrill) Winslow et al. [ERWIAM]	Plants for planting, other than seeds, of <i>Amelanchier</i> Medik., <i>Chaenomeles</i> Lindl., <i>Cotoneaster</i> Medik., <i>Crataegus</i> Tourn. ex L., <i>Cydonia</i> Mill., <i>Eriobtrya</i> Lindl., <i>Malus</i> Mill., <i>Mespilus</i> Bosc ex Spach, <i>Photinia davidiana</i> Decne., <i>Pyracantha</i> M. Roem., <i>Pyrus</i> L. and <i>Sorbus</i> L.	0%
Xanthomonas euvesicatoria Jones et al. [XANTEU]	Capsicum annuum L.	0%
Xanthomonas gardneri (ex Šutič) Jones et al. [XANTGA]	Capsicum annuum L.	0%
Xanthomonas perforans Jones et al. [XANTPF]	Capsicum annuum L.	0%
Xanthomonas vesicatoria (ex Doidge) Vauterin et al. [XANTVE]	Capsicum annuum L.	0%
Fungi and oomycetes		
(1)	(2)	(3)
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Thresholds for the propagating material of ornamental plants concerned and other plants for planting intended for ornamental purposes
Dothistroma septosporum (Dorogin) Morelet [SCIRPI]	Plants for planting, other than seeds, of <i>Pinus</i> L.	0%
Phytophthora austrocedri Greslebin & Hansen [PHYTAU]	Plants for planting, other than seeds, of <i>Chamaecyparis lawsoniana</i> (Murr.) Parl., <i>Chamaecyparis nootkatensis</i> (D.Don) Sudw./(Lamb.) Spach, <i>Cupressus sempervirens</i> var. <i>sempervirens</i> L., <i>Juniperus communis</i> ssp. <i>communis</i> L. and <i>Libocedrus chilensis</i> (D.Don) Endl.	0%
Phytophthora lateralis T. Jung, M.J.C. Stukely & T.I. Burgess [PHYTLI]	Plants for planting, other than seeds, of <i>Chamaecyparis</i> formosensis Matsum., <i>Chamaecyparis</i> lawsoniana (Murr.) Parl., <i>Chamaecyparis</i> obtusa Sieb. & Zucc. ex Endl., <i>Chamaecyparis pisifera</i> Sieb. &	0%

Plasmopara halstedii (Farlow) Seeds of Helianthus annuus L. 0% Berlese & de Toni [PLASHA] Puccinia horiana P. Hennings Plants for planting, other than 0% [PUCCHN] seeds, of Chrysanthemum L. **Insects and mites** (1)(2) (3) RNOPs or symptoms caused by Plants for planting (genus or Thresholds for the **RNOPs** propagating material species) of ornamental plants concerned and other plants for planting intended for ornamental purposes Opogona sacchari Bo Plants for planting, other 0% [OPOGSC] than seeds, of Beaucarnea Lem., Bougainvillea Comm. ex Juss., Crassula L., Crinum L., Dracaena Vand. ex L., Ficus L., Musa L., Pachira Aubl., Palmae, Sansevieria Thunb. and Yucca L. **Nematodes** (1)(2) (3) RNQPs or symptoms caused by Plants for planting (genus or Thresholds for the **RNOPs** propagating material species) of ornamental plants concerned and other plants for planting intended for ornamental purposes Ditylenchus dipsaci (Kuehn) Plants for planting, other than 0% Filipjev [DITYDI] seeds. of Camassia Lindl., Chionodoxa Boiss., Crocus flavus Weston, Galanthus L., Hyacinthus Tourn. ex L, Hymenocallis Salisb., Muscari Mill., Narcissus L., Ornithogalum L., Puschkinia Adams, Scilla L., Sternbergia Waldst. & Kit. and Tulipa L. Viruses, viroids, virus-like diseases and phytoplasmas (1)(3) RNOPs or symptoms caused by Plants for planting (genus or Thresholds for the **RNOPs** species) propagating material of ornamental plants concerned and other plants for planting intended for ornamental purposes

Status: This is the original version (as it was originally made).

Candidatus Phytoplasma 'pyri' Plants for planting, other than 0% Seemüller & Schneider seeds, of *Pyrus* L.

[PHYPPY]

Chrysanthemum stunt viroid Plants for planting, other than 0% [CSVD00] seeds, of Argyranthemum Webb ex Sch.Bip. and Chrysanthemum

L.

Impatiens necrotic spot Plants for planting, other than tospovirus [INSV00] seeds, of Begonia x hiemalis

Fotsch, *Impatiens* L. and New Guinea Hybrids

Potato spindle tuber viroid *Capsicum annuum* L. 0% [PSTVD0]

Plum pox virus [PPV000] Plants for planting, other than seeds, of the following species of

Prunus L.:

Prunus armeniaca L., Prunus blireiana Andre. Prunus brigantina Vill., Prunus cerasifera Ehrh., Prunus cistena Hansen, Prunus curdica Fenzl and Fritsch., Prunus domestica ssp. domestica L., Prunus domestica ssp. insititia (L.) C.K. Schneid, Prunus domestica ssp. italica (Borkh.) Hegi., Prunus dulcis (Mill.) D. A. Webb, Prunus glandulosa Thunb., Prunus holosericea Batal., Prunus hortulana Bailey, Prunus japonica Thunb., Prunus mandshurica (Maxim.) Koehne, Prunus maritima Marsh., Prunus mume Sieb. and Zucc., Prunus nigra Ait., Prunus persica (L.) Batsch, Prunus salicina L., Prunus sibirica L., Prunus simonii Carr., Prunus spinosa L., Prunus tomentosa Thunb., Prunus triloba Lindl. and other species of *Prunus* L. susceptible to Plum pox virus

Tomato ringspot virus Plants for [TORSV0] than seed

Plants for planting, other 0% than seeds, of *Pelargonium x hortorum*, *Prunus* L. and *Rubus* L.

Tomato spotted wilt tospovirus Plants for planting other than [TSWV00] Plants for planting other than seeds, of *Begonia x hiemalis* 

Fotsch, Capsicum annuum L., Chrysanthemum L., Gerbera L., Impatiens L., New Guinea Hybrids and Pelargonium L.

PART D
RNQPs concerning forest reproductive material, other than seeds

Fungi and oomycetes					
(1)	(2)	(3)			
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Thresholds for the forest reproductive material concerned			
Dothistroma septosporum (Dorogin) Morelet [SCIRPI]	Pinus L.	0%			

PART E
RNQPs concerning vegetable seed

Fungi and oomycetes		
(1)	(2)	(3)
RNQPs or symptoms caused by RNQPs	Plants for planting (seeds) (genus or species)	Thresholds for the vegetable seed concerned
Candidatus Liberibacter 'solanacearum' Liefting et al. [LIBEPS]	Solanum lycopersicum L.	0%
Clavibacter michiganensis ssp. michiganensis (Smith) Davis et al. [CORBMI]		0%
Xanthomonas axonopodis pv. phaseoli (Smith) Vauterin et al. [XANTPH]	Phaseolus vulgaris L.	0%
Xanthomonas fuscans subsp. fuscans Schaad et al. [XANTFF]	Phaseolus vulgaris L.	0%
Xanthomonas euvesicatoria Jones et al. [XANTEU]	1	0%
Xanthomonas gardneri (ex Šutič 1957) Jones <i>et al.</i> [XANTGA]	•	0%

Xanthomonas perforans Jones et al. [XANTPF]	Capsicum annuum L. and Solanum lycopersicum L.	0%
Xanthomonas vesicatoria (ex Doidge) Vauterin et al. [XANTVE]	Capsicum annuum L. and Solanum lycopersicum L.	0%
Insects and mites		
(1)	(2)	(3)
RNQPs or symptoms caused by RNQPs	Plants for planting (seeds) (genus or species)	Thresholds for the vegetable seed concerned
Acanthoscelides obtectus (Say) [ACANOB]	Phaseolus coccineus L. and Phaseolus vulgaris L.	0%
Bruchus pisorum (Linnaeus) [BRCHPI]	Pisum sativum L.	0%
Bruchus rufimanus Boheman [BRCHRU]	Vicia faba L.	0%
Nematodes		
(1)	(2)	(3)
RNQPs or symptoms caused by RNQPs	Plants for planting (seeds) (genus or species)	Thresholds for the vegetable seed concerned
Ditylenchus dipsaci (Kuehn) Filipjev [DITYDI]	Allium cepa L., Allium porrum L.	0%
Viruses, viroids, virus-like dis	seases and phytoplasmas	
(1)	(2)	(3)
RNQPs or symptoms caused by RNQPs	Plants for planting (seeds) (genus or species)	Thresholds for the vegetable seed concerned
Pepino mosaic virus [PEPMV0]	Solanum lycopersicum L.	0%
Potato spindle tuber viroid [PSTVD0]	Capsicum annuum L. and Solanum lycopersicum L.	0%
Tomato apical stunt viroid [TASVD0]	Solanum lycopersicum L.	0%
Tomato chlorotic dwarf viroid [TCDVD0]	Solanum lycopersicum L.	0%

PART F
RNQPs concerning seed potatoes

<u>(1)</u>	(2)	(3)		(4)	(5)
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Thresho direct p	olds for the rogeny of pre- red potatoes PB	Thresholds for the direct progeny of basic seed potatoes	Thresholds for the direct progeny of certified seed potatoes
Symptoms of virus infection	Solanum tuberosum L.	0%	0.5%	4%	10%
Blackleg ( <i>Dickeya</i> Samson <i>et al.</i> spp. [1DICKG]; <i>Pectobacterium</i> Waldee emend. Hauben <i>et al.</i> spp. [1PECBG])	Solanum tuberosum L.	0%	Practically free	Practically free	Practically free
Candidatus Liberibacter 'solanacearum' Liefting et al. [LIBEPS]	Solanum tuberosum L.	0%	0%	0%	0%
Ditylenchudestructor Thorne [DITYDE]	Solanum tuberosum L.	0%	0%	0%	0%
Black scurf as caused by <i>Thanatephorus</i> cucumeris (A.B. Frank) Donk [RHIZSO]		0%	tubers over more than		tubers over more than 10% of their
2	Solanum tuberosum L.	0%	tubers over more than		tubers over more than 10% of their
Mosaic symptoms caused by viruses	Solanum tuberosum L.	0%	0.1%	0.8%	6%
and					
symptoms caused by Potato leaf roll virus [PLRV00]					
Meloidogyne fallax Karssen [MELGFA]		0%	0%	0%	0%

(1)	(2)	(3)		(4)	(5)
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	direct p	olds for the rogeny of pre- red potatoes PB	Thresholds for the direct progeny of basic seed potatoes	Thresholds for the direct progeny of certified seed potatoes
Potato spindle tuber viroid [PSTVD0]	Solanum tuberosum L.	0%	0%	0%	0%

# PART G

# RNQPs concerning seed of oil and fibre plants

In this Part, 'specified size', in relation to a seed lot, means—

- (a) in the case of seed of Brassica rapa L. var. silvestris (Lam.) Briggs, 70g;
- (b) in the case of seed of Brassica napus L. (partim), 100g;
- (c) in the case of seed of Sinapis alba L., 200g.

Fungi and oomy	cetes			
(1)	(2)	(3)	(4)	(5)

## **SCHEDULE 5**

Regulation 8

## New Annex 5 to the Phytosanitary Conditions Regulation

#### "ANNEX 5

Measures to prevent the presence of RNQPs on specific plants for planting

Table of C	Contents
Part A:	Measures to prevent the presence of RNQPs on fodder plant seed
Part B:	Measures to prevent the presence of RNQPs on propagating material of Vitis sp.
Part C:	Measures to prevent the presence of RNQPs on propagating material of ornamental plants and plants for planting intended for ornamental purposes
Part D:	Measures to prevent the presence of RNQPs on forest reproductive material, other than seeds
Part E:	Measures to prevent the presence of the RNQPs on vegetable seed
Part F:	Measures to prevent the presence of the RNQPs on seed potatoes
Part G:	Measures to prevent the presence of RNQPs on seed of oil and fibre plants
Part H:	Measures to prevent the presence of RNQPs on vegetable propagating and planting material, other than seeds
Part I:	Measures to prevent the presence of the RNQPs on seed of Solanum tuberosum L.
Part J:	Measures to prevent the presence of the RNQPs on plants for planting of <i>Humulus lupulus</i> , other than seeds

## Interpretation

## In this Annex:

'competent authority', in relation to plants for planting originating in a third country, means the national plant protection organisation of the country of origin or any official authority or body acting under the supervision of the national plant protection organisation;

'RNQPs' means GB regulated non-quarantine pests.

## PART A

Measures to prevent the presence of RNQPs on fodder plant seed

## 1. Inspection of the crop

- (1) The competent authority, or the professional operator under the official supervision of the competent authority, must carry out field inspections on the crop from which the fodder plant seed is produced concerning the presence of RNQPs in the crop to ensure that the presence of RNQPs does not exceed the thresholds set out in the table in Part A of Annex 4.
- (2) For the purposes of point (1), the competent authority may authorise inspectors, other than the professional operators, to carry out the field inspections on its behalf and under its official supervision.

- (3) Field inspections may only be carried out when the condition and the stage of development of the crop allow for an adequate inspection. At least one field inspection must be carried out each year, at the most appropriate time for the detection of the respective RNQPs.
- (4) The competent authority must determine the size, the number and the distribution of the portions of the field to be inspected in accordance with appropriate methods.
- (5) The proportion of the crops for the production of seed to be officially inspected by the competent authority must be at least 5%.
  - 2. Sampling and testing of fodder plant seed
  - (1) The competent authority must:
    - (a) officially draw seed samples from lots of fodder plant seed;
    - (b) authorise seed samplers to carry out sampling on its behalf and under its official supervision;
    - (c) compare the seed samples drawn by itself with those of the same seed lot drawn by the seed samplers under official supervision as referred to in point (b);
    - (c) supervise the performance of the seed samplers provided for in point (2).
- (2) The competent authority or the professional operator under official supervision must sample and test the fodder plant seed in accordance with up-to-date international methods.
- (3) Except for automatic sampling, the competent authority must check a proportion of at least 5 % of the seed lots entered for official certification.
- (4) That proportion must be as spread as evenly possible over natural and legal persons entering seed for certification, and the species entered, but may also be aimed at eliminating specific doubts.
- (5) In the case of automatic sampling, appropriate procedures must be applied and the sampling must be officially supervised.
- (6) For the examination of seed for certification, samples must be drawn from homogeneous lots and, as regards the lot and sample weights, in accordance with the table in Annex 3 to Directive 66/401/EEC.
- **3.** The competent authority, or the professional operator under the official supervision of the competent authority, must carry out checks and take any other action which is necessary or appropriate to ensure that the requirements specified in the following table in relation to the respective RNQPs and plants for planting are satisfied:

RNQPs or symptoms caused by RNQPs	Plants for plan (genus or species)	nting Red	quirements
Clavibacter michiganensis	· · · · · · · · · · · · · · · · · · ·	and (a)	the seeds originate in areas known
ssp. <i>insidiosus</i>	certified seeds	of	to be free from <i>Clavibacter</i>
	<i>Medicago sativa</i> L.		michiganensis spp. insidiosus,

(b) the crop has been grown on land on which no previous *Medicago* sativa L. crop was present during the last three years prior to sowing, and no symptoms of *Clavibacter* michiganensis ssp. insidiosus have been observed during any field inspection at the site of production or no symptoms of *Clavibacter* michiganensis ssp. insidiosus have been observed on any *Medicago* 

RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Requirements
caused by KivQ1's	(genus or species)	sativa L. crop adjacent to it, during the previous cropping, or  (c) the crop belongs to a variety recognised as being highly resistant to Clavibacter michiganensis ssp. insidiosus and the content of inert matter does not exceed 0.1% by weight
Ditylenchus dipsaci	Pre-basic, basic and certified seeds of Medicago sativa L.	d (a) no symptoms of <i>Ditylenchus</i> dipsaci have been observed at the site of production during the previous cropping, no main host crops have been grown during the two preceding years on the site of production and appropriate hygiene measures have been taken to prevent infestation of the place of production, (b) no symptoms of <i>Ditylenchus</i> dipsaci have been observed at the site of production during the previous cropping and no Ditylenchus dipsaci has been found by laboratory tests on a representative sample, or (c) the seeds have been subjected to an appropriate physical or chemical treatment against Ditylenchus dipsaci and have been found to be free of this pest after laboratory tests on a representative sample.

## PART B

Measures to prevent the presence of RNQPs on propagating material of Vitis sp.

The competent authority, or the professional operator under the official supervision of the competent authority, must carry out checks and take any other action which is necessary or appropriate to ensure that the requirements specified in the following table in relation to the respective RNQPs and plants for planting are satisfied:

Insects and mites				
RNQPs or sympto by RNQPs	oms caused	Plants for plantin (genus or species)	ng Req	uirements
Daktulosphaira Fitch [VITEVI]	vitifoliae	Vitis vinifera L.	(a)	the plants have been produced in areas known to be free from <i>Daktulosphaira vitifoliae</i> Fitch,

- (b) the plants have been grafted on rootstocks resistant to Daktulosphaira vitifoliae Fitch, or
- (c) in the case where propagating material which is intended for marketing showed signs or symptoms of *Daktulosphaira* vitifoliae Fitch, the entire lot of that material has been subjected to fumigation, hot water treatment or another appropriate treatment in accordance with protocols of the European and Mediterranean Plant Protection Organization, or other protocols which are internationally recognised to ensure freedom from *Daktulosphaira vitifoliae* Fitch.

Viruses, viroids, virus-like	Viruses, viroids, virus-like diseases and phytoplasmas		
(1)	(2)	(3)	
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Requirements	
Arabis mosaic virus [ARMV00], Grapevine fanleaf virus [GFLV00], Grapevine fleck virus [GFKV00], Grapevine leafroll associated virus 1 [GLRAV1] and Grapevine leafroll associated virus 3 [GLRAV3]	Vitis vinifera L.	Symptoms of all viruses listed in column 1 have been observed on no more than 10% of vines in the stock nurseries and those vines have been eliminated from propagation.	

## PART C

Measures to prevent the presence of RNQPs on propagating material of ornamental plants and other plants for planting intended for ornamental purposes

The competent authority, or the professional operator under the official supervision of the competent authority, must carry out checks and take any other action which is necessary or appropriate to ensure that the requirements specified in the following table in relation to the respective RNQPs and plants for planting are satisfied:

Bacteria		
(1)	(2)	(3)
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Requirements
Erwinia amylovora (Burrill) Winslow et al. [ERWIAM	1 0,	1

Chaenomeles Lindl., Medik., Cotoneaster Cydonia Mill., Eriobtrya Lindl.. Malus Mill.. Mespilus Bosc ex Spach, Photinia davidiana Decne., Pyracantha M. Roem., Pyrus L. and

Crataegus Tourn. ex L., (b) Sorbus L.

Erwinia amylovora (Burrill) Winslow et al., or the plants have been grown in a production site that has been visually inspected at an appropriate time during the last growing season for the detection of that pest and plants showing symptoms of that pest, and any surrounding host plants, have been immediately rogued out and destroyed.

Xanthomonas euvesicatoria Capsicum annuum L. Jones et al. [XANTEU]

#### In the case of seeds:

- the seeds originate in areas known to be free from *Xanthomonas* euvesicatoria Jones et al.,
- (b) no symptoms of disease caused by Xanthomonas euvesicatoria Jones et al. have been observed on visual inspections at appropriate times to detect the pest during the complete cycle of vegetation of the plants at the site of production, or
- the seeds have been subjected to official testing for *Xanthomonas* euvesicatoria Jones et al. on a representative sample using appropriate methods (whether or not following an appropriate treatment) and have been found in those tests to be free from Xanthomonas euvesicatoria Jones et al.

In the case of plants other than seeds:

- (a) the seedlings have been grown from seeds that meet the above requirements, and
- (b) the plants have been maintained in appropriate hygiene conditions to prevent infection.

Xanthomonas gardneri (ex Capsicum annuum L. Šutič) Jones [XANTGA]

#### In the case of seeds:

- the seeds originate in areas known to be free from *Xanthomonas* gardneri (ex Šutič) Jones et al.,
- no symptoms of disease caused by Xanthomonas gardneri (ex Šutič) Jones et al. have been observed on visual inspections at appropriate times during the complete cycle of

- vegetation of the plants at the site of production, or
- (c) the seeds have been subjected to official testing for *Xanthomonas gardneri* (ex Šutič) Jones *et al.* on a representative sample using appropriate methods (whether or not following an appropriate treatment) and have been found in those tests to be free from *Xanthomonas gardneri* (ex Šutič) Jones *et al.*

In the case of plants other than seeds:

- (a) the seedlings have been grown from seeds that meet the above requirements, and
- (b) the plants have been maintained in appropriate hygiene conditions to prevent infection.

*Xanthomonas perforans Capsicum annuum* L. Jones *et al.* [XANTPF]

#### In the case of seeds:

- (a) the seeds originate in areas known to be free from *Xanthomonas perforans* Jones *et al.*,
- (b) no symptoms of disease caused by *Xanthomonas* perforans Jones et al. have been observed on visual inspections at the site of production at appropriate times during the complete cycle of vegetation of the plants, or
- (c) the seeds have been subjected to official testing for *Xanthomonas perforans* Jones *et al.* on a representative sample using appropriate methods (whether or not following an appropriate treatment) and have been found in those tests to be free from that pest.

In the case of plants other than seeds:

(a) the seedlings have been grown from seeds that meet the above requirements, and

(b) the plants have been maintained in appropriate hygiene conditions to prevent infection.

Fungi and oomycetes			
(1)	(2)	(3)	
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Requ	uirements
Dothistroma septosporum (Dorogin) Morelet [SCIRPI]	Pinus L.	(a) (b)	the plants originate in areas known to be free from <i>Dothistroma</i> septosporum (Dorogin) Morelet, no symptoms of needle blight, caused by <i>Dothistroma</i> septosporum (Dorogin) Morelet, have been observed at the site of production or its immediate vicinity since the beginning of the last complete cycle of vegetation, or
		(c)	appropriate treatments have been carried out against needle blight, caused by <i>Dothistroma</i> septosporum (Dorogin) Morelet and the plants have been inspected before movement and found free from symptoms of needle blight.
	Plants for planting, other than seeds, of <i>Chamaecyparis lawsoniana</i> (Murr.) Parl., <i>Chamaecyparis nootkatensis</i> (D.Don) Sudw./(Lamb.) Spach, <i>Cupressus sempervirens</i> var. <i>sempervirens</i> L., <i>Juniperus communis</i> ssp. <i>communis</i> L., and	(a) (b)	the plants originate in areas known to be free from <i>Phytophthora</i> austrocedri Greslebin & Hansen, or no symptoms of <i>Phytophthora</i> austrocedri Greslebin & Hansen have been observed on plants at the site of production since the beginning of the last complete cycle of vegetation.
Phytophthora lateralis T. Jung, M.J.C. Stukely & T.I. Burgess [PHYTLI]	Libocedrus chilensis (D.Don) Endl.  Plants for planting, other than seeds, of Chamaecyparis formosensis Matsum., Chamaecyparis lawsoniana (Murr.) Parl., Chamaecyparis obtusa Sieb. & Zucc. ex Endl., Chamaecyparis pisifera Sieb. & Zucc. ex Endl.,	(b)	the plants originate in areas known to be free from <i>Phytophthora lateralis</i> T. Jung, M.J.C. Stukely & T.I. Burgess, or no symptoms of <i>Phytophthora lateralis</i> T. Jung, M.J.C. Stukely & T.I. Burgess have been observed on plants at the site of production since the beginning of the last complete cycle of vegetation.

*Taxus brevifolia* Nutt. and *Thuja occidentalis* L.

Plasmopara halstedii Seeds of Helianthus (a) (Farlow) Berlese & de Toni annuus L. [PLASHA]

- the seeds originate in areas known to be free from *Plasmopara halstedii* (Farlow) Berlese & de Toni,
- (b) no symptoms of *Plasmopara*halstedii (Farlow) Berlese & de

  Toni have been observed at the
  seed production site in at least two
  inspections at appropriate times to
  detect the pest during the growing
  season,
- (c) (i) the seed production site has been subject to at least two inspections at appropriate times to detect the pest, during the growing season,
  - (ii) no more than 5% of plants have shown symptoms of *Plasmopara halstedii* (Farlow) Berlese & de Toni during those inspections, and all plants showing symptoms of *Plasmopara halstedii* (Farlow) Berlese & de Toni have been removed and destroyed immediately after inspection, and
  - (iii) at the final inspection no plants have been found showing symptoms of *Plasmopara halstedii* (Farlow) Berlese & de Toni,
- (d) (i) the seed production site has been subject to at least two inspections at appropriate times to detect the pest during the growing season,
  - (ii) all plants showing symptoms of *Plasmopara halstedii* (Farlow) Berlese & de Toni have been removed and destroyed immediately after inspection, and
  - (iii) at the final inspection, no plants have been found showing symptoms of *Plasmopara halstedii* (Farlow) Berlese & de Toni, and a representative sample from each lot has

been tested and found free from *Plasmopara halstedii* (Farlow) Berlese & de Toni, or

(e) the seeds have been subjected to an appropriate treatment which has been demonstrated to be effective against all known strains of *Plasmopara halstedii* (Farlow) Berlese & de Toni.

Puccinia horiana Hennings [PUCCHN] P. Chrysanthemum L.

- (a) the plants derive from mother plants which have been inspected at least monthly during the previous three months and no symptoms have been seen at the site of production, or
- (b) mother plants showing symptoms have been removed and destroyed, along with plants within a 1 m radius, and an appropriate physical or chemical treatment has been applied to the plants which have been inspected before movement and found free from symptoms.

and found free from symptoms of

Opogona sacchari Bojer.

		3 1
Insects and mites		
(1)	(2)	(3)
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Requirements
Opogona sacchari Bojer [OPOGSC]	Beaucarnea Lem., Bougainvillea Comm. ex Juss., Crassula L., Crinum L., Dracaena Vand. ex L., Ficus L., Musa L., Pachira Aubl., Palmae, Sansevieria Thunb. and Yucca L.	in areas known to be free from <i>Opogona sacchari</i> Bojer, (b) the plants have been grown at a production site at which no symptoms or signs of <i>Opogona</i>

(1) (2) (3) RNQPs or symptoms caused Plants for planting Requirements (genus or species) by RNOPs Ditylenchus dipsaci (Kuehn) Plants for planting, other (a) the plants have been inspected Filipjev [DITYDI] than seeds, of Camassia and no symptoms of *Ditylenchus* Lindl.. Chionodoxa dipsaci (Kuehn) Filipjev have Crocus flavus been observed on the lot since the Boiss., Weston, Galanthus L., beginning of the last complete Hyacinthus Tourn. ex cycle of vegetation, or L., Hymenocallis Salisb., (b) the bulbs have been found free Muscari Mill., Narcissus from symptoms of *Ditylenchus* L., Ornithogalum L., dipsaci (Kuehn) Filipjev on the basis of visual inspections Puschkinia Adams, Sternbergia Waldst. & carried out at the most appropriate Kit., Scilla L., and Tulipa time to detect the pest, and have L. been packed for sale to the final consumer. Viruses, viroids, virus-like diseases and phytoplasmas (1)(2) (3)RNQPs or symptoms caused Plants for planting Requirements by RNOPs (genus or species) Phytoplasma Plants for planting, other (a) Candidatus the plants: 'pyri' Seemüller & than seeds, of *Pyrus* L. derive from mother plants (i) Schneider [PHYPPY] which have been visually inspected and found free from symptoms of Candidatus Phytoplasma 'pyri' Seemüller & Schneider, and (aa) have been produced (ii) in areas known to be free from Candidatus Phytoplasma 'pyri' Seemüller & Schneider, (bb) the plants have been grown in a site of production found free from the pest over the last complete growing season by visual inspection, and any symptomatic plants in the immediate vicinity have been rogued out and destroyed immediately, or (b) no more than 2% of plants in the site of production have

shown symptoms during visual inspections at appropriate times during the last growing season, and those symptomatic plants and any symptomatic plants in the immediate vicinity have been rogued out and destroyed immediately.

Chrysanthemum stunt viroid Plants [CSVD00] other

Plants for planting, The plants derive within three generations other than seeds, of of propagation from stock which has been *Argyranthemum* Webb found to be free from Chrysanthemum ex Sch.Bip. and stunt viroid by testing. *Chrysanthemum* L.

Impatiens necrotic tospovirus [INSV00]

spot Plants for planting, other (a) than seeds, of *Begonia x hiemalis*, Fotsch, *Impatiens* L. and New Guinea Hybrids

- the plants have been grown in a site of production that has been subjected to a monitoring of relevant thrips vectors (*Frankliniella occidentalis* Pergande) and, upon their detection, to appropriate treatments to ensure effective suppression of their populations, and no symptoms of *Impatiens* necrotic spot tospovirus have been observed on plants at the site of production during the current growing period, or
- (b) any plants at the production site showing symptoms of *Impatiens* necrotic spot tospovirus during the current growing period have been rogued out and a representative sample of the plants has been tested and found free from Impatiens necrotic spot tospovirus.

Potato spindle tuber viroid *Capiscum annuum* L. [PSTVD0]

- (a) no symptoms of diseases caused by Potato spindle tuber viroid have been observed on the plants at the place of production during their complete cycle of vegetation, or
- (b) the plants have been subjected to official testing for Potato spindle tuber viroid, on a representative sample and using appropriate methods, and have been found in those tests to be free from that pest.

Plum pox virus [PPV000]

Plants for planting, other (a) than seeds, of following species of *Prunus* L.:

in the case of vegetatively propagated rootstocks of *Prunus* L., they are derived from mother plants which have been sampled

(b)

Prunus armeniaca L., Prunus blireiana Andre, Prunus brigantina Vill.. Prunus cerasifera Ehrh., Prunus cistena Hansen, Prunus curdica Fenzl and Fritsch.. Prunus domestica ssp. domestica L., Prunus domestica ssp. insititia (L.) K. Schneid, Prunus domestica ssp. italica (Borkh.) Hegi., Prunus dulcis (Mill.) D. A. Webb. Prunus glandulosa Thunb., Prunus holosericea Batal., Prunus hortulana Bailey, Prunus japonica Thunb., Prunus mandshurica (Maxim.) Koehne, Prunus maritima Marsh., Prunus mume Sieb. and Zucc., Prunus nigra Ait., *Prunus persica* (L.) Batsch, Prunus salicina L., Prunus sibirica L., Prunus simonii Carr., Prunus spinosa L., Prunus tomentosa Thunb., Prunus triloba Lindl. and all other Prunus L. susceptible to Plum pox virus Fotsch

and tested within the previous five years and found free from Plum pox virus, and

- (i) the plants have been produced in areas known to be free from Plum pox virus,
- (ii) no symptoms of Plum pox virus have been observed on the plants at the site of production over the last complete growing season and in the most appropriate period of the year, taking into account the climatic conditions and the growing conditions of the plant and the biology of Plum pox virus, and any symptomatic plants in the immediate vicinity have been rogued out and immediately destroyed, or
- (iii) where symptoms of Plum pox virus have been observed on no more than 1% of plants at the site of production over the last complete growing season and in the most appropriate period of the year, taking into account the climatic conditions and the growing conditions of the plant and the biology of Plum pox virus, any symptomatic plants in the immediate vicinity have been rogued out and immediately destroyed, and a representative sample of the remaining asymptomatic plants in the lots in which symptomatic plants were found has been tested and found free from the pest.

Tomato ringspot virus *Pelargonium* L'Herit. ex (a) [TORSV0] Ait.

the plants originate from places of production known to be free from Tomato ringspot virus, or

(b) the plants are no more than fourth generation stock, derived from mother plants found to be free Tomato ringspot [TORSV0]

virus Plants for planting, other (a) than seeds, of Malus L. and *Prunus* L.

from Tomato ringspot virus by testing.

- the plants are derived in direct line from material which has been maintained under appropriate conditions and has been subjected, at least once within the last three complete cycles of vegetation, to official testing for at least the pest Tomato ringspot virus, using appropriate indicators or equivalent methods, and has been found free from the pests tested, and
- (b) no symptoms of diseases caused by Tomato ringspot virus item have been observed on plants at the place of production, or on susceptible plants in its immediate vicinity, since the beginning of the last complete cycle of vegetation.

Tomato spotted tospovirus [TSWV00]

wilt Plants for planting, other (a) than seeds, of *Begonia x hiemalis* Fotsch, *Capsicum annuum* L., *Chrysanthemum* L., Gerbera L., *Impatiens* L., New Guinea Hybrids and *Pelargonium* L.

- the plants have grown in a site of production that has been subjected to a monitoring of relevant thrips vectors (*Frankliniella occidentalis* and *Thrips tabaci*) and, upon their detection, to appropriate treatments to ensure effective suppression of their populations, and no symptoms of Tomato spotted wilt tospovirus have been observed on plants at the site of production during the current growing period, or
- (b) any plants at the production site showing symptoms of Tomato spotted wilt tospovirus during the current growing period have been rogued out and a representative sample of the plants to be moved has been tested and found free from Tomato spotted wilt tospovirus.

#### PART D

Measures to prevent the presence of RNQPs on forest reproductive material, other than seeds

1. Visual inspections

- (1) The competent authority, or the professional operator under the official supervision of the competent authority, must carry out checks and take any other action which is necessary or appropriate to ensure that the requirements in point (2) are satisfied in respect of forest reproductive material, other than seeds, of *Pinus* spp.
- (2) The requirements are that the forest reproductive material is found free from *Dothistroma* septosporum upon visual inspection at the production site or place.
- (3) The visual inspections must take place once a year, in the most appropriate period to detect those pests, taking into account the climatic conditions and the growing conditions of the plant, and the biology of the pest.

## 2. Other requirements

- (1) The competent authority, or the professional operator under the official supervision of the competent authority, must carry out checks and take any other action which is necessary or appropriate to ensure that, the requirements in point (2) are satisfied in respect of forest reproductive material of *Pinus* spp.
  - (2) The requirements are that:
    - (a) the forest reproductive material originates in areas known to be free from *Dothistroma* septosporum;
    - (b) no symptoms of needle blight caused by *Dothistroma septosporum* have been observed at the place or site of production or its immediate vicinity over the last complete growing season; or
    - (c) appropriate treatments have been carried out in the place or site of production against needle blight caused by *Dothistroma septosporum* and the forest reproductive material has been visually inspected before movement and found free from symptoms of *Dothistroma septosporum*.

#### PART E

## Measures to prevent the presence of RNQPs on vegetable seed

The competent authority, or the professional operator under the official supervision of the competent authority, must carry out checks and take any other action which is necessary or appropriate to ensure that the requirements specified in the following table in relation to the respective RNQPs and plants for planting are satisfied:

Bacteria		
(1)	(2)	(3)
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Requirements
Clavibacter michiganensis subsp. michiganensis (Smith) Davis et al. [CORBMI]	2 1	(a) the seeds have been obtained by means of an appropriate acid extraction method or an equivalent method, and (b) (i) the seeds originate in areas known to be free from <i>Clavibacter michiganensis</i> ssp. <i>michiganensis</i> (Smith) Davis <i>et al.</i> ,

- (ii) no symptoms of disease caused by *Clavibacter michiganensis* ssp. michiganensis (Smith) Davis *et al.* have been observed on visual inspections at appropriate times to detect the pest during the complete cycle of vegetation of the plants at the site of production, or
- (iii) the seeds have been subjected to official testing for *Clavibacter michiganensis* ssp. *michiganensis* (Smith) Davis *et al.* on a representative sample using appropriate methods and have been found in those tests to be free from that pest.

Xanthomonas axonopodis Phaseolus vulgaris L. pv. phaseoli (Smith)
Vauterin et al. [XANTPH]

- (a) the seeds originate in areas known to be free from *Xanthomonas* axonopodis pv. phaseoli (Smith) Vauterin et al.,
- (b) the crop from which the seed was harvested has been visually inspected at appropriate times during the growing season and found free from *Xanthomonas axonopodis* pv. *phaseoli* (Smith) Vauterin *et al.*, or
- (c) a representative sample of the seeds has been tested and found in those tests to be free from *Xanthomonas axonopodis* pv. *phaseoli* (Smith) Vauterin *et al.*.
- Xanthomonas fuscans subsp. Phaseolus vulgaris L. fuscans Schaad et al. [XANTFF]
- (a) the seeds originate in areas known to be free from *Xanthomonas* fuscans subsp. fuscans Schaad et al.,
- (b) the crop from which the seed was harvested has been visually inspected at appropriate times during the growing season and found free from *Xanthomonas* fuscans subsp. fuscans Schaad et al., or
- (c) a representative sample of the seeds has been tested and found in those tests to be free from

I (a)

Xanthomonas fuscans subsp. fuscans Schaad et al.

*Xanthomonas euvesicatoria Capsicum annuum* L. Jones *et al.* [XANTEU]

- (a) the seeds originate in areas known to free from *Xanthomonas* euvesicatoria Jones et al.,
- (b) no symptoms of disease caused by *Xanthomonas euvesicatoria* Jones *et al.* have been observed on visual inspections at appropriate times to detect the pest during the complete cycle of vegetation of the plants at the site of production, or
- (c) the seeds have been subjected to official testing for *Xanthomonas* euvesicatoria Jones et al. on a representative sample using appropriate methods (whether or not following an appropriate treatment) and have been found in those tests to be free from that pest.

Xanthomonas euvesicatoria Solanum lycopersicum (a) Jones et al. [XANTEU] L.

the seeds have been obtained by an appropriate acid extraction, and originate in areas known to free from *Xanthomonas euvesicatoria* Jones *et al.*, and

- (b) either:
  - (i) no symptoms of disease caused by *Xanthomonas* euvesicatoria Jones et al. have been observed on visual inspections at appropriate times to detect the pest during the complete cycle of vegetation of the plants at the site of production, or
  - (ii) the seeds have been subjected to official testing for *Xanthomonas euvesicatoria* Jones *et al.* on a representative sample using appropriate methods (whether or not following an appropriate treatment) and have been found in those tests to be free from that pest.

Xanthomonas gardneri (ex Capsicum annuum L. Šutič) Jones *et al.* [XANTGA]

- (a) the seeds originate in areas known to be free from *Xanthomonas* gardneri (ex Šutič) Jones et al.,
- (b) no symptoms of disease caused by *Xanthomonas gardneri* (ex Šutič)

Jones *et al.* have been observed on visual inspections at appropriate times to detect the pest during the complete cycle of vegetation of the plants at the site of production, or the seeds have been subjected to

plants at the site of production, or the seeds have been subjected to official testing for *Xanthomonas gardneri* (ex Šutič) Jones *et al.* on a representative sample using appropriate methods (whether or not following an appropriate treatment) and have been found in those tests to be free from that pest.

Xanthomonas gardneri (ex Solanum lycopersicum (a) Šutič) Jones et al. L. [XANTGA]

the seeds have been obtained by an appropriate acid extraction and originate in areas known to be free from *Xanthomonas gardneri* (ex Šutič) Jones *et al.*, and

- (b) either:
  - (i) no symptoms of disease caused by *Xanthomonas* gardneri (ex Šutič) Jones et al. have been observed on visual inspections at appropriate times during the complete cycle of vegetation of the plants at the site of production, or
  - (ii) the seeds have been subjected to official testing for *Xanthomonas gardneri* (ex Šutič) Jones *et al.* on a representative sample and using appropriate methods (whether or not following an appropriate treatment) and have been found in those tests to be free from that pest.

*Xanthomonas perforans Capsicum annuum* L Jones *et al.* [XANTPF]

- (a) the seeds originate in areas known to be free from *Xanthomonas* perforans Jones et al.,
- (b) no symptoms of disease caused by *Xanthomonas perforans* Jones *et al.* have been observed on visual inspections at appropriate times during the complete cycle of vegetation of the plants at the site of production, or
- (c) the seeds have been subjected to official testing for *Xanthomonas* perforans Jones et al. on a

representative sample using appropriate methods (whether or not following an appropriate treatment) and have been found in those tests to be free from that pest.

Xanthomonas perforans Solanum lycopersicum (a) Jones et al. [XANTPF] L.

the seeds have been obtained by an appropriate acid extraction and originate in areas known to be free from *Xanthomonas perforans Jones et al.*, or

- (b) (i) no symptoms of disease caused by *Xanthomonas* perforans Jones et al have been observed on visual inspections at appropriate times during the complete cycle of vegetation of the plants at the site of production, or
  - (ii) the seeds have been subjected to official testing for *Xanthomonas perforans* Jones *et al.* on a representative sample using appropriate methods (whether or not following an appropriate treatment) and have been found in those tests to be free from that pest.

Xanthomonas vesicatoria Capsicum annuum L (ex Doidge) Vauterin et al. [XANTVE]

- (a) the seeds originate in areas known to be free from *Xanthomonas vesicatoria* (ex Doidge) Vauterin *et al.*,
- (b) no symptoms of disease caused by *Xanthomonas vesicatoria* (ex Doidge) Vauterin *et al.* have been observed on visual inspections at appropriate times during the complete cycle of vegetation of the plants at the site of production, or
- (c) the seeds have been subjected to official testing for *Xanthomonas vesicatoria* (ex Doidge) Vauterin *et al.* on a representative sample using appropriate methods (whether or not following an appropriate treatment) and have been found in those tests to be free from that pest.

Xanthomonas vesicatoria (ex Doidge) Vauterin et al. [XANTVE]  Insects and mites	2 1	<ul> <li>(a) the seeds have been obtained by an appropriate acid extraction and originate in areas known to be free from <i>Xanthomonas vesicatoria</i> (ex Doidge) Vauterin <i>et al.</i>,</li> <li>(b) no symptoms of disease caused by <i>Xanthomonas vesicatoria</i> (ex Doidge) Vauterin <i>et al.</i> have been observed on visual inspections at appropriate times during the complete cycle of vegetation of the plants at the site of production, or</li> <li>(c) the seeds have been subjected to official testing for <i>Xanthomonas vesicatoria</i> (ex Doidge) Vauterin <i>et al.</i> on a representative sample using appropriate methods (whether or not following an appropriate treatment) and have been found in those tests to be free from that pest.</li> </ul>
(1)	(2)	(3)
(1)	(2)	(3)
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Requirements
Acanthoscelides obtectus (Say) [ACANOB]		A representative sample of the seed has been subject to visual inspection at the most appropriate time to detect <i>Acanthoscelides obtectus</i> (Say), which may be following an appropriate treatment, and the seed has been found to be free from that pest.
Bruchus pisorum (L.) [BRCHPI]	Pisum sativum L.	A representative sample of the seed has been subject to visual inspection at the most appropriate time to detect <i>Bruchus pisorum</i> (L.), which may be following an appropriate treatment, and the seed has been found to be free from that pest.
[BRCHRU]	Vicia faba L.	A representative sample of the seed has been subject to visual inspection at the most appropriate time to detect <i>Bruchus rufimanus</i> L., which may be following an appropriate treatment, and the seed has been found to be free from that pest.
Nematodes		
(1)	(2)	(3)
		Requirements

RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)		
Ditylenchus dipsaci (Kuehn) Filipjev [DITYDI]	Allium cepa L. and Allium porrum L.	(a) (b)	the crop has been visually inspected at least once at an appropriate time to detect Ditylenchus dipsaci (Kuehn) Filipjev since the beginning of the last complete cycle of vegetation and no symptoms of that pest have been observed, the harvested seeds have been found to be free of Ditylenchus dipsaci (Kuehn) Filipjev after laboratory tests on a representative
		(c)	sample, or the planting material has been subjected to an appropriate chemical or physical treatment against <i>Ditylenchus dipsaci</i> (Kuehn) Filipjev and the seeds have been found to be free of that pest after laboratory tests on a representative sample.
Viruses, viroids, virus-like			
(1)	(2)	(3)	
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Requ	uirements
Pepino mosaic virus [PEPMV0]	Solanum lycopersicum L.	(a) (b)	the seeds have been obtained by means of an appropriate acid extraction method or an equivalent method, and (i) the seeds originate in areas where Pepino mosaic virus is known not to occur, (ii) no symptoms of diseases caused by Pepino mosaic virus have been observed on the plants at the place of production during their complete cycle of vegetation, or (iii) the seeds have been subjected to official testing for Pepino mosaic virus, on a representative sample using appropriate methods, and have been found in those tests to be free from that pest.

Potato spindle tuber viroid *Capsicum annuum* L., (a) [PSTVD0] and *Solanum lycopersicum* L.

- the seeds originate in areas where Potato spindle tuber viroid is not known to occur,
- (b) no symptoms of diseases caused by Potato spindle tuber viroid have been observed on the plants at the place of production during their complete cycle of vegetation, or
- (c) the seeds have been subjected to official testing for Potato spindle tuber viroid, on a representative sample using appropriate methods and have been found in those tests to be free from that pest.
- Tomato apical stunt viroid *Solanum lycopersicum* (a) [TASVD0] L.
- the seeds originate in areas where Tomato apical stunt viroid is not known to occur,
- (b) no symptoms of diseases caused by Tomato apical stunt viroid have been observed on the plants at the place of production during their complete cycle of vegetation, or
- (c) the seeds have been subjected to official testing for Tomato apical stunt viroid on a representative sample using appropriate methods and have been found in those tests to be free from that pest.
- Tomato chlorotic dwarf *Solanum lycopersicum* (a) viroid [CSVS0] L.
- the seeds originate in areas where Tomato chlorotic dwarf viroid is not known to occur.
- (b) no symptoms of diseases caused by Tomato chlorotic dwarf viroid have been observed on the plants at the place of production during their complete cycle of vegetation, or
- (c) the seeds have been subjected to official testing for Tomato chlorotic dwarf viroid on a representative sample using appropriate methods and have been found in those tests to be free from that pest.

#### PART F

## Measures to prevent the presence of RNQPs on seed potatoes

The competent authority, or the professional operator under the official supervision of the competent authority, must carry out checks and take any other action which is necessary or appropriate to ensure

that the requirements specified in the following table in relation to the respective RNQPs and plants for planting are satisfied:

(1)	(2)	(3)
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Requirements
Blackleg (Dickeya Samson et al. spp. [1DICKG]; Pectobacterium Waldee emend. Hauben et al. spp. [1PECBG])	Solanum tuberosum L.	In the case of pre-basic seed potatoes, official inspections show that they derive from mother plants which are free from <i>Dickeya</i> Samson <i>et al.</i> spp. and <i>Pectobacterium</i> Waldee emend. Hauben <i>et al.</i> spp.
		In the case of all categories, the growing plants have been subjected to official field inspections by the competent authority.
	Solanum tuberosum L.	In the case of pre-basic seed potatoes,
'solanacearum' Liefting <i>et al.</i> [LIBEPS]		official inspections show that they derive from mother plants which are free from <i>Candidatus</i> Liberibacter 'solanacearum' Liefting <i>et al</i> .
		In the case of all categories:
		(a) the plants have been produced in areas known to be free from <i>Candidatus</i> Liberibacter 'solanacearum' Liefting <i>et al.</i> , taking into account the possible presence of the vectors, or
		(b) no symptoms of <i>Candidatus</i> Liberibacter 'solanacearum' Liefting <i>et al.</i> , have been seen during official inspections by the competent authority of growing plants at the site of production since the start of the last complete cycle of vegetation.
Mosaic symptoms caused by viruses and symptoms caused by Potato leaf roll virus	Solanum tuberosum L.	In the case of pre-basic seed potatoes, they derive from mother plants which are free from Potato virus A, Potato virus M, Potato virus S, Potato virus X, Potato virus Y and Potato leaf roll virus.
		Where methods of micro-propagation

are used, compliance with this requirement must be established by

(1)	(2)	(3)
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Requirements
		official testing, or testing under official supervision, of the mother plant.  Where methods of clonal selection are used, compliance with this requirement must be established by official testing, or testing under official supervision, of the clonal stock.
		In the case of all categories, the growing plants have been subjected to official inspection by the competent authority.
Meloidogyne fallax Karssen [MELGFA]	Solanum tuberosum L.	(a) the tubers originate in an area in which Meloidogyne fallax Karssen is known not to occur, or (b) where they originate in an area in which Meloidogyne fallax Karssen is known to occur: (i) that the tubers originate from a place of production which has been found free from Meloidogyne fallax Karssen based on an annual survey of host crops, by visual inspection of host plants at appropriate times and by visual inspection both externally and by cutting of tubers after harvest from potato crops grown at the place of production, or (ii) that after harvest the tubers have been randomly sampled and checked for the presence of symptoms after an appropriate method to induce symptoms or laboratory tested, as well as inspected visually, both externally and by cutting the tubers, at appropriate times, and no symptoms of Meloidogyne fallax Karssen have been
Potato spindle tuber viroid [PSTVD0]	Solanum tuberosum L.	found.  In the case of clonal stock, official testing, or testing under official supervision, has shown that they derive

(1)	(2)	(3)
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Requirements
		from mother plants which are free from Potato spindle tuber viroid.
		In the case of pre-basic and basic seed potatoes, no symptoms of Potato spindle tuber viroid have been found, or for each lot, official post-harvest testing of tubers have been performed and those tubers have been found free from Potato spindle tuber viroid.
		In the case of certified seed potatoes, official visual inspection has shown that they are free from Potato spindle tuber viroid, and if any symptoms of the pest were seen, testing was carried out.
Symptoms of virus infection	Solanum tuberosum L.	During official inspection of the direct progeny, the number of symptomatic plants did not exceed the threshold specified in Part F of Annex 4.
Candidatus Liberibacter 'solanacearum' Liefting et al. [LIBEPS]	Solanum tuberosum L.	The competent authority has subjected the lots to official inspection and confirms that they do not exceed the threshold specified in Part F of Annex 4.
Ditylenchus destructor Thorne [DITYDE]	Solanum tuberosum L.	The competent authority has subjected the lots to official inspection and confirms that they do not exceed the threshold specified in Part F of Annex 4.
Black scurf affecting tubers over more than 10% of their surface, as caused by <i>Thanatephorus</i> cucumeris (A.B. Frank) Donk [RHIZSO]	Solanum tuberosum L.	The competent authority has subjected the lots to official inspection and confirms that they do not exceed the threshold specified in Part F of Annex 4.
Powdery scab affecting tubers over more than 10% of their surface as caused by <i>Spongospora subterranea</i> (Wallr.) Lagerh. [SPONSU].	Solanum tuberosum L.	The competent authority has subjected the lots to official inspection and confirms that they do not exceed the threshold specified in Part F of Annex 4.

In addition, the competent authority must carry out official inspections to ensure that the presence of the RNQPS on the growing plants specified in any entry of the table below do not exceed the thresholds in the corresponding entries of the table:

(1)	(2)	(3)		(4)	(5)
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	direct p	olds for the rogeny of pre- red potatoes PB	Thresholds for the direct progeny of basic seed potatoes	Thresholds for the direct progeny of certified seed potatoes
Symptoms of virus infection	Solanum tuberosum L.	0%	0.5%	4%	10%
	Solanum tuberosum L.	0%	Practically free	Practically free	Practically free
Candidatus Liberibacter solanacearum Liefting et al. [LIBEPS]	Solanum tuberosum L.	0%	0%	0%	0%
Ditylenchudestructor Thorne [DITYDE]	Solanum tuberosum L.	0%	0%	0%	0%
Black scurf as caused by <i>Thanatephorus</i> cucumeris (A.B. Frank) Donk [RHIZSO]		0%	tubers over more than		tubers over more than 10% of their
•	Solanum tuberosum L.	0%	tubers over more than		tubers over more than 10% of their
Mosaic symptoms caused by viruses	Solanum tuberosum L.	0%	0.1%	0.8%	6%
and					
symptoms caused by Potato leaf roll virus [PLRV00]					
Meloidogyne fallax Karssen [MELGFA]		0%	0%	0%	0%
Potato spindle tuber viroid [PSTVD0]	Solanum tuberosum L.	0%	0%	0%	0%

#### PART G

Measures to prevent the presence of RNQPS on seed of oil and fibre plants

- 1. Inspection of the crop
- (1) The competent authority, or the professional operator under the official supervision of the competent authority, must carry out field inspections on the crop from which the seed of *Helianthus annuus* L. is produced concerning the presence of *Plasmopara halstedii* (Farlow) Berlese & de Toni in the crop to ensure that the presence of that pest does not exceed the thresholds set out in the table in Part G of Annex 4.
- (2) For the purposes of point (1), the competent authority may authorise inspectors, other than the professional operators, to carry out the field inspections on its behalf and under its official supervision.
- (3) Those field inspections must be carried out when the condition and the stage of development of the crop allow for an adequate inspection. At least one field inspection must be carried out each year, at the most appropriate time for the detection of the respective RNQPs.
- (4) The competent authority must determine the size, the number and the distribution of the portions of the field to be inspected in accordance with appropriate methods.
- (5) The proportion of the crops for the production of seed to be officially inspected by the competent authority must be at least 5%.
  - 2. Sampling and testing of oil and fibre plants
  - (1) The competent authority must:
    - (a) officially draw seed samples from lots of oil and fibre plants;
    - (b) authorise seed samplers to carry out sampling on its behalf and under its official supervision;
    - (c) compare the seed samples drawn by itself with those of the same seed lot drawn by the seed samplers under official supervision as referred to in point (b);
    - (c) supervise the performance of the seed samplers.
- (2) The competent authority or the professional operator under official supervision must sample and test oil and fibre plants in accordance with up-to-date international methods.
- (3) Except for automatic sampling, the competent authority must check a proportion of at least 5 % of the seed lots entered for official certification.
- (4) That proportion must be spread as evenly as possible over natural and legal persons entering seed for certification and the species entered, but may also be aimed at eliminating specific doubts.
- (5) In the case of automatic sampling, appropriate procedures must be applied and the sampling must be officially supervised.
- (6) For the examination of seed for certification, samples must be drawn from homogeneous lots and, as regards the lot and sample weights, in accordance with the table in Annex 3 to Directive 66/401/EEC.
- **3.** The competent authority, or the professional operators under the official supervision of the competent authority, must carry out additional inspections and take any other action which is necessary or appropriate to ensure that the requirements specified in the following table in relation to the respective RNQPs and plants for planting are satisfied:

(1)	(2)		(3)		
RNQPs or symptoms caused by RNQPs	Plants for pla (genus or spe	_	Req	uirem	ents
~	(genus or spe	_		the s L. or free (Farl no sy halsi Toni prod inspe	eeds of Helianthus annuus riginate in areas known to be from Plasmopara halstedii low) Berlese & de Toni, ymptoms of Plasmopara tedii (Farlow) Berlese & de have been observed at the uction site in at least two ections at appropriate times ng the growing season, or the production site has been subject to at least two field inspections at appropriate times to detect Plasmopara halstedii Farlow) Berlese & de Toni during the growing season, no more than 5 % of plants have shown symptons of Plasmopara halstedii (Farlow) Berlese & de Toni during field inspection and all plants showing symptoms of that pest have been removed and destroyed immediately after inspection, and at the final inspection no plants have been found showing symptoms of Plasmopara halstedii (Farlow) Berlese & de Toni, the production site has been subject to at least two field inspections at appropriate times during the growing season, all plants showing symptoms of Plasmopara halstedii (Farlow) Berlese & de Toni
				(iii)	have been removed and destroyed immediately after inspection, and at the final inspection, no plants have been found
					showing symptoms of Plasmopara. Halstedii (Farlow) Berlese & de Toni,

(1)	(2)	(3)	
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Requ	uirements
		(e)	and a representative sample from each lot has been tested and found free from that plant pest, or the seeds have been subjected to an appropriate treatment which has been demonstrated to be effective against all known strains of <i>Plasmopara halstedii</i> (Farlow) Berlese & de Toni.
Botrytis cinerea	Seeds of Helianthus annuus L. and Linum usitatissimum L	(a) (b)	seed treatment authorised for use against <i>Botrytis cinerea</i> has been applied, or the set tolerance on the seed is not exceeded on the basis of a laboratory test of a representative sample.
Diaporthe caulivora (Diaporthe phaseolorum var. caulivora)	Seeds of <i>Glycine max</i> (L.) Merryl	(a) (b)	seed treatment authorised for use against <i>Diaporthe caulivora</i> ( <i>Diaporthe phaseolorum</i> var. <i>caulivora</i> ) has been applied, or the set tolerance on the seed is not exceeded on the basis of a laboratory test of a representative sample.
Diaporthe var. sojae	Seeds of <i>Glycine max</i> (L.) Merryl	(a) (b)	seed treatment authorised for use against <i>Diaporthe</i> var. <i>sojae</i> has been applied, or the set tolerance on the seed is not exceeded on the basis of a laboratory test of a representative sample.
Alternaria linicola	Seeds of Linum usitatissimum L.	(a) (b)	seed treatment authorised for use against <i>Alternaria linicola</i> has been applied, or the set tolerance on the seed is not exceeded on the basis of a laboratory test of a representative sample.
Boeremia exigua var. linicola	Seeds of Linum usitatissimum L.	(a) (b)	seed treatment authorised for use against <i>Boeremia exigua</i> var. <i>linicola</i> has been applied, or the set tolerance on the seed is not exceeded on the basis of a laboratory test of a representative sample.

(1)	(2)		(3)	
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species	_	Req	uirements
Colletotrichum lini	Seeds of usitatissimum L.	Linum	(a) (b)	seed treatment authorised for use against <i>Colletotrichum lini</i> has been applied, or the set tolerance on the seed is not exceeded on the basis of a laboratory test of a representative sample.
Fusarium (anamorphic genus), other than Fusarium oxysporum f. sp. albedinis (Kill. & Maire) W.L. Gordon and Fusarium circinatum Nirenberg & O'Donnell		Linum	(a) (b)	seed treatment authorised for use against <i>Fusarium</i> (anamorphic genus), other than <i>Fusarium oxysporum</i> f. sp. <i>albedinis</i> (Kill. & Maire) W.L. Gordon and <i>Fusarium circinatum</i> Nirenberg & O'Donnell, has been applied, or the set tolerance on the seed is not exceeded based on laboratory test of a representative sample.

#### PART H

# Measures to prevent the presence of RNQPs on vegetable propagating and planting material, other than seeds

- 1. The competent authority, or the professional operator under the official supervision of the competent authority, must carry out checks and take any other action which is necessary or appropriate to ensure that:
  - (a) the plants appear at least, on visual inspection, to be practically free from pests listed in the table below, in respect of the genera or species concerned;
  - (b) any plants showing visible signs or symptoms of the pests listed in the table below, at the stage of the growing crop, have been treated properly immediately upon their appearance or, where appropriate, have been eliminated;
  - (c) in the case of bulbs of shallots and garlic, the plants derive directly from material which, at the stage of the growing crop, has been checked and found to be practically free from any pest listed in the table below.
- **2.** In addition, the competent authority, or the professional operator under the official supervision of the competent authority, must carry out checks and take any other action which is necessary or appropriate to ensure that the requirements specified in the following table in relation to the respective RNQPs and plants for planting, are satisfied:

Bacteria		
(1)	(2)	(3)
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Requirements

Candidatus Liberibacter 'solanacearum' Liefting et al. [LIBEPS]	2 1	<ul> <li>(a) the plants have been produced in areas known to be free from <i>Candidatus</i> Liberibacter 'solanacearum' Liefting <i>et al.</i>, taking into account the possible presence of the vectors, or</li> <li>(b) no symptoms of <i>Candidatus</i> Liberibacter 'solanacearum' Liefting <i>et al.</i>, have been seen during official inspections by the competent authority of growing plants at the site of production since the start of the last complete cycle of vegetation.</li> </ul>
Clavibacter michiganensis subsp. michiganensis (Smith) Davis et al. [CORBMI]		The plants have been grown from seeds which comply with the requirements specified in Part E of Annex 5 and have been maintained free from infection by appropriate hygiene measures.
Xanthomonas euvesicatoria Jones et al. [XANTEU]		The seedlings have been grown from seeds which comply with the requirements specified in Part E of Annex 5 and the plants have been maintained free from infection by appropriate hygiene measures.
Xanthomonas gardneri (ex Šutič) Jones et al. [XANTGA]		The seedlings have been grown from seeds which comply with the requirements specified in Part E of Annex 5 and the plants have been maintained free from infection by appropriate hygiene measures.
Xanthomonas perforans Jones et al. [XANTPF]	Capsicum annuum L. and Solanum lycopersicum L.	The seedlings have been grown from seeds which comply with the requirements specified in Part E of Annex 5 and the plants have been maintained free from infection by appropriate hygiene measures.
Xanthomonas euvesicatoria Jones et al. [XANTEU]		The seedlings have been grown from seeds which comply with the requirements specified in Part E of Annex 5 and the plants have been maintained free from infection by appropriate hygiene measures.
Fungi and oomycetes		
(1)	(2)	(3)
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Requirements

Fusarium Link (anamorphic Asparagus officinalis L. (a) genus), other than Fusarium oxysporum f. sp. albedinis (Kill. & Maire) W.L. Gordon and Fusarium circinatum Nirenberg & O'Donnell ("the pest")

- the crop has been visually inspected as follows:
- it has been inspected at an appropriate time for the detection of the pest during the growing season, a representative sample of the plants have been uprooted and no symptoms of the pest have been observed, or
- it has been inspected at least twice at appropriate times for the detection of the pest during the growing season and plants showing symptoms of the pest have been rogued out immediately with no symptoms seen at a final inspection of the growing crop, and
- the crowns have been visually inspected before movement and no symptoms of the pest have been seen.

Helicobasidium brebissonii Asparagus officinalis L. (a) (Desm.) Donk [HLCBBR]

- the crop has been visually inspected as follows:
  - it has been inspected at an appropriate time for the detection of Helicobasidium brebissonii (Desm.) Donk during the growing season, a representative sample of the plants have been uprooted and no symptoms of that pest have been observed, or
  - (ii) it has been inspected at least twice at appropriate times for the detection of Helicobasidium brebissonii (Desm.) Donk during the growing season and plants showing symptoms of that pest have been rogued out immediately with no symptoms seen at a final inspection of the growing crop, and
- (b) the crowns have been visually inspected before movement and no symptoms of *Helicobasidium* brebissonii (Desm.) Donk have been seen.

Stromatinia cepivora Berk. Allium cepa L., Allium (a) [SCLOCE] fistulosum L. and Allium porrum L.

- the plants are module-raised transplants grown in medium free from *Stromatinia cepivora* Berk., or
- (b) the crop has been visually inspected at an appropriate time for the detection of *Stromatinia cepivora* Berk. during the growing season, and:
  - (i) no symptoms of that pest have been observed, or
  - (ii) plants showing symptoms of *Stromatinia cepivora*Berk. have been rogued out immediately with no symptoms seen at an additional final inspection of the growing crop, and
- (c) the plants have been visually inspected before movement and no symptoms of *Stromatinia cepivora*Berk, have been seen.

Stromatinia cepivora Berk. Allium sativum L. [SCLOCE]

- (a) the crop has been visually inspected as follows:
  - (i) it has been inspected at an appropriate time for the detection of *Stromatinia cepivora* Berk, during the growing season and no symptoms of that pest have been observed, or
  - (ii) it has been inspected at an appropriate time for the detection of *Stromatinia cepivora* Berk. during the growing season and plants showing symptoms of that pest have been rogued out immediately with no symptoms seen at an additional final inspection of the growing crop, and
- (b) the plants have been visually inspected before movement and no symptoms of *Stromatinia cepivora* Berk. have been seen.

Verticillium dahlia Kleb. Cynara cardunculus L. [VERTDA]

- (a) mother plants derive from pathogen-tested material,
- (b) the plants have been grown in a site of production of which the cropping history is known, with

no records of the occurrence of *Verticillium dahliae* Kleb., and
(c) the plants have been visually inspected at appropriate times since the beginning of the last complete cycle of vegetation and found to be free from symptoms of *Verticillium dahliae* Kleb.

				Verticillium dahliae Kleb.
Nematodes				
(1)	(2)	(	(3)	
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	F	Requi	irements
Ditylenchus dipsaci (Kuehn) Filipjev [DITYDI]	Allium cepa L. Allium sativum L.	f (	(c)	case of plants, other than plants e production of a commercial crop the crop has been visually inspected at least once at an appropriate time for the detection of the pest since the beginning of the last complete cycle of vegetation and no symptoms of Ditylenchus dipsaci (Kuehn) Filipjev have been observed,  (i) the crop has been visually inspected at least once at an appropriate time for the detection of the pest since the beginning of the last complete cycle of vegetation and not more than 2% of plants have shown symptom of Ditylenchus dipsaci (Kuehn) Filipjev infestation,  (ii) the plants found to be infected by that pest have been rogued out immediately and  (iii) the plants have subsequently been found to be free from that pest through laboratory tests on a representative sample, or the plants have been subjected to an appropriate chemical or physical treatment against Ditylenchus dipsaci (Kuehn)
				Filipjev and have been found to be

In the case of plants for production of a commercial crop:

free from that pest after laboratory tests on a representative sample.

- (a) the crop has been visually inspected at least once at an appropriate time for the detection of the pest since the beginning of the last complete cycle of vegetation and no symptoms of *Ditylenchus dipsaci* (Kuehn) Filipjev have been observed,
- (b) (i) the crop has been inspected at least once at an appropriate time for the detection of the pest since the beginning of the last complete cycle of vegetation,
  - (ii) plants showing symptoms of *Ditylenchus dipsaci* (Kuehn) Filipjev have been rogued out immediately, and
  - (iii) the plants have subsequently been found to be free from that pest after laboratory tests on a representative sample, or
- (c) the plants have been subject to an appropriate physical or chemical treatment and have been found to be free of *Ditylenchus dipsaci* (Kuehn) Filipjev after laboratory tests on a representative sample.

Viruses, viroids, virus-like diseases and phytoplasmas				
(1)	(2)	(3)		
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Requirements		
Leek yellow stripe virus [LYSV00]	Allium sativum L.	<ul> <li>(a) the crop has been visually inspected at least once at an appropriate time for the detection of Leek yellow stripe virus since the beginning of the last complete cycle of vegetation and no symptoms of that pest have been seen, or</li> <li>(b) (i) the crop has been visually inspected at least once at an appropriate time</li> </ul>		

for the detection of Leek yellow stripe virus since the beginning of the last complete cycle of vegetation on which inspection not more than 10% of the plants showed symptoms of that pest,

- (ii) the plants found infected by that pest were rogued out immediately, and
- (iii) not more than 1% of plants showed symptoms of that pest on a final inspection.
- Onion yellow dwarf virus *Allium cepa* L. and (a) [OYDV00] *Allium sativum* L.

the crop has been visually inspected at least once at an appropriate time since the beginning of the last complete cycle of vegetation and no symptoms of Onion yellow dwarf virus have been seen, or

- (b) (i) the crop has been visually inspected at least once at an appropriate time for the detection of Onion yellow dwarf virus since the beginning of the last complete cycle of vegetation on which inspection not more than 10% of the plants showed symptoms of that pest, and
  - (ii) the plants found infected by that pest were rogued out immediately, and
  - (iii) not more than 1% of plants showed symptoms of that pest on a final inspection.

Potato spindle tuber viroid *Capsicum annuum* L. (a) [PSTVD0] and *Solanum lycopersicum* L.

no symptoms of diseases caused by Potato spindle tuber viroid have been observed on the plants at the place of production during their complete cycle of vegetation, or the plants have been subjected to

- complete cycle of vegetation, or
  the plants have been subjected to
  official testing for Potato spindle
  tuber viroid on a representative
  sample using appropriate methods
  and have been found to be in those
  tests, free from that pest.
- Tomato apical stunt viroid *Solanum lycopersicum* (a) [TASVD0] L.

no symptoms of diseases caused by Tomato apical stunt viroid have

been observed on the plants at the place of production during their complete cycle of vegetation, or the plants have been subjected to official testing for Tomato apical stunt viroid on a representative sample using appropriate methods and have been found in those tests to be free from that pest.

Tomato chlorotic dwarf *Solanum lycopersicum* (a) viroid [TCDVD0] L.

no symptoms of diseases caused by Tomato chlorotic dwarf viroid have been observed on the plants at the place of production during their complete cycle of vegetation, or

- (b) the plants have been subjected to official testing for Tomato chlorotic dwarf viroid on a representative sample using appropriate methods and have been found in those tests to be free from that pest.
- Tobacco mild green mosaic Solanum lycopersicum (a) virus [TMGMV0] L. and Capsicum annuum L.
- no symptoms of diseases caused by Tobacco mild green mosaic virus have been observed on the plants at the place of production during their complete cycle of vegetation, or
- (b) the plants have been subjected to official testing for Tobacco mild green mosaic virus on a representative sample using appropriate methods and have been found in those tests to be free from that pest.

Tomato spotted wilt Capsicum annuum L., (a) tospovirus [TSWV00] 

\*\*Lactuca sativa L., Solanum lycopersicum L. and Solanum melongena L.\*\*

- the plants have been grown in a site of production that has been subjected to a monitoring regime of relevant thrips vectors (*Frankliniella occidentalis* Pergande and *Thrips tabaci* Lindeman), and upon detection of those vectors appropriate treatments have been carried out to ensure effective suppression of populations, and
- (b) (i) no symptoms of Tomato spotted wilt tospovirus have been observed on plants at the site of production during

- the current growing period, or
- (ii) any plants at the production site showing symptoms of Tomato spotted wilt tospovirus during the current growing period have been rogued out and a representative sample of the plants has been tested and found to be free from that pest.

## PART I

Measures to prevent the presence of RNQPs on seed of Solanum tuberosum L.

The competent authority, or the professional operator under the official supervision of the competent authority, must carry out checks and take any other action which is necessary or appropriate to ensure that the following requirements are satisfied in relation to seed of *Solanum tuberosum*:

- (a) the seeds originate in areas where Potato spindle tuber viroid is not known to occur;
- (b) no symptoms of diseases caused by Potato spindle tuber viroid have been observed on the plants at the place of production during their complete cycle of vegetation; or
- (c) the plants have been subjected to official testing for Potato spindle tuber viroid, on a representative sample using appropriate methods and have been found in those tests to be free from that pest.

#### PART J

Measures to prevent the presence of RNQPs on plants for planting of *Humulus lupulus* L., other than seeds

The competent authority, or the professional operator under the official supervision of the competent authority, must carry out checks and take any other action which is necessary or appropriate to ensure that the requirements specified in the following table in relation to the respective RNQPs and plants for planting are satisfied:

Fungi			
(1)	(2)	(3)	
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Requ	uirements
Verticillium dahliae Kleb. [VERTDA]	Plants for planting, other than seeds, of <i>Humulus lupulus</i> L.	(a) (b)	the plants for planting derive from mother plants which have been visually inspected at the most appropriate time and found to be free from symptoms of <i>Verticillium dahlia</i> , and the plants for planting have been:

- (i) produced in a place of production known to be free from *Verticilium dahlia*, or
- (ii) isolated from production crops of *Humulus lupulus*, and:
  - (aa) the production site
    has been found to be
    free from *Verticillium dahliae* over the last
    complete growing
    season at appropriate
    times by visual
    inspection of the
    foliage at the most
    appropriate time, and
  - (bb) the cropping and soilborne disease history of fields has been recorded and there has been a rest period from host plants of at least four years between findings of *Verticillium* dahliae and the next planting.

Verticillium nonalfalfae Humulus lupulus L. Inderbitzin, H.W. Platt, Bostock, R.M. Davis & K.V. Subbarao [VERTNO]

- (a) the plants for planting derive from mother plants which have been visually inspected at the most appropriate time and found to be free from symptoms of *Verticillium nonalfalfae*, and
- (b) the plants for planting have been:
  - i) produced in a place of production known to be free from *Verticillium nonalfalfae*, or
  - (ii) isolated from production crops of *Humulus lupulus*, and
    - (aa) the production site
      has been found to be
      free from *Verticillium*nonalfalfae over
      the last complete
      growing season at
      appropriate times by
      visual inspection of the
      foliage, and
    - (bb) the cropping and soilborne disease history of fields have been

recorded and there has been a rest period from host plants of at least four years between findings of Verticillium nonalfalfae and the next planting.

#### SCHEDULE 6

Regulation 9

New Annex 6 to the Phytosanitary Conditions Regulation

#### "ANNEX 6

List of plants, plant products and other objects which may not be introduced into Great Britain if originating or dispatched from certain third countries

## PART A

List of plants, plant products and other objects from third countries, other than high-risk plants, plant products and other objects, which may not be introduced into Great Britain

(1)(2) Description of plants, plant products or Third country, group of third countries or other objects specific area of third country 1. Plants, other than fruit and seeds, of Abies Any third country other than: Albania, Mill., Cedrus Trew, Chamaecyparis Spach, Andorra, Armenia, Azerbaijan, Belarus, Juniperus L., Larix Mill., Picea A. Dietr., Bosnia and Herzegovina, Canary Islands, Pinus L., Pseudotsuga Carr. and Tsuga EU Member States, Faroe Islands, Georgia, Iceland, Liechtenstein, Moldova, Monaco, Carr. Montenegro, North Macedonia, Norway, Russia (only the following parts: Central Federal District (Tsentralny federalny Northwestern Federal District okrug), (Severo-Zapadny federalny okrug), Southern Federal District (Yuzhny federalny okrug), North Caucasian Federal District (Severo-Kavkazsky federalny okrug) and Volga Federal District (Privolzhsky federalny okrug)), San Marino, Serbia, Switzerland, Turkey and Ukraine

2.

Plants, other than fruit and seeds, of Any third country other than: Albania, Castanea Mill. and Quercus L., with leaves Andorra, Armenia, Azerbaijan, Belarus, Bosnia and Herzegovina, Canary Islands, EU Member States, Faroe Islands, Georgia, Iceland, Liechtenstein, Moldova, Monaco,

	(1)	(2)
	Description of plants, plant products or other objects	Third country, group of third countries or specific area of third country
		Montenegro, North Macedonia, Norway, Russia (only the following parts: Central Federal District (Tsentralny federalny okrug), Northwestern Federal District (Severo-Zapadny federalny okrug), Southern Federal District (Yuzhny federalny okrug), North Caucasian Federal District (Severo-Kavkazsky federalny okrug) and Volga Federal District (Privolzhsky federalny okrug)), San Marino, Serbia, Switzerland, Turkey and Ukraine
3.	Plants, other than fruit and seeds, of <i>Populus</i> L., with leaves	Canada, Mexico and the USA
4.	Isolated bark of Castanea Mill.	Any third country other than EU Member States, Liechtenstein and Switzerland
5.	Isolated bark of <i>Quercus</i> L., other than <i>Quercus suber</i> L.	Canada, Mexico and the USA
6.	Isolated bark of Acer saccharum Marsh.	Canada, Mexico and the USA
7.	Isolated bark of <i>Populus</i> L.	The Americas
8.	plants free from leaves, flowers and fruits, of <i>Chaenomeles</i> Ldl., <i>Crataegus</i> L.,	Any third country other than: Albania, Andorra, Armenia, Azerbaijan, Belarus, Bosnia and Herzegovina, Canary Islands, EU Member States, Faroe Islands, Georgia, Iceland, Liechtenstein, Moldova, Monaco, Montenegro, North Macedonia, Norway, Russia (only the following parts: Central Federal District (Tsentralny federalny okrug), Northwestern Federal District (Severo-Zapadny federalny okrug), Southern Federal District (Yuzhny federalny okrug), North Caucasian Federal District (Severo-Kavkazsky federalny okrug) and Volga Federal District (Privolzhsky federalny okrug)), San Marino, Serbia, Switzerland, Turkey and Ukraine
9.	Plants for planting, other than seeds, of <i>Cydonia</i> Mill., <i>Malus</i> Mill., <i>Prunus</i> L., <i>Pyrus</i> L. and their hybrids, and <i>Fragaria</i> L.	Albania, Algeria, Andorra, Armenia,

following parts: Central Federal District

	(1)	(2)
	Description of plants, plant products or other objects	Third country, group of third countries or specific area of third country
		(Tsentralny federalny okrug), Northwestern Federal District (Severo-Zapadny federalny okrug), Southern Federal District (Yuzhny federalny okrug), North Caucasian Federal District (Severo-Kavkazsky federalny okrug) and Volga Federal District (Privolzhsky federalny okrug)), San Marino, Serbia, Switzerland, Syria, Tunisia, Turkey, Ukraine and the USA, other than Hawaii
10.	Plants, other than fruits, of Vitis L.	Any third country other than EU Member States, Liechtenstein and Switzerland
11.	Plants for planting, other than seeds, of <i>Citrus</i> L., <i>Fortunella</i> Swingle and <i>Poncirus</i> Raf., and their hybrids	Any third country other than EU Member States, Liechtenstein and Switzerland
12.		China, Democratic People's Republic of Korea, Japan, Republic of Korea and the USA
13.	Plants, other than fruit and seeds, of <i>Phoenix</i> spp.	Algeria and Morocco
14.	of the family <i>Poaceae</i> , other than plants of ornamental perennial grasses of the subfamilies <i>Bambusoideae</i> and <i>Panicoideae</i> and of the genera <i>Buchloe</i> , <i>Bouteloua</i> Lag., <i>Calamagrostis</i> , <i>Cortaderia</i> Stapf., <i>Glyceria</i> R. Br., <i>Hakonechloa</i> Mak. ex Honda, <i>Hystrix</i> ,	Any third country other than: Albania, Algeria, Andorra, Armenia, Azerbaijan, Belarus, Bosnia and Herzegovina, Canary Islands, Egypt, EU Member States, Faroe Islands, Georgia, Iceland, Israel, Jordan, Lebanon, Libya, Liechtenstein, Moldova, Monaco, Montenegro, Morocco, North Macedonia, Norway, Russia (only the following parts: Central Federal District (Tsentralny federalny okrug), Northwestern Federal District (Severo-Zapadny federalny okrug), Southern Federal District (Yuzhny federalny okrug), North Caucasian Federal District (Severo-Kavkazsky federalny okrug) and Volga Federal District (Privolzhsky federalny okrug)), San Marino, Serbia, Switzerland, Syria, Tunisia, Turkey and Ukraine
15.	Tubers of Solanum tuberosum L., seed potatoes	Any third country other than EU Member States, Liechtenstein and Switzerland
16.	Plants for planting of stolon- or tuber- forming species of <i>Solanum</i> L. and their hybrids, other than tubers of <i>Solanum</i> tuberosum L. specified in entry 15	Any third country other than EU Member States, Liechtenstein and Switzerland

	(1)	(2)
	Description of plants, plant products or other objects	Third country, group of third countries or specific area of third country
17.		Any third country other than Algeria, Bosnia and Herzegovina, Egypt, EU Member States, Israel, Libya, Liechtenstein, Morocco, Serbia, Syria, Switzerland, Tunisia and Turkey
18.		Any third country other than: Albania, Algeria, Andorra, Armenia, Azerbaijan, Belarus, Bosnia and Herzegovina, Canary Islands, Egypt, EU Member States, Faroe Islands, Georgia, Iceland, Israel, Jordan, Lebanon, Libya, Liechtenstein, Moldova, Monaco, Montenegro, Morocco, North Macedonia, Norway, Russia (only the following parts: Central Federal District (Tsentralny federalny okrug), Northwestern Federal District (Severo-Zapadny federalny okrug), Southern Federal District (Yuzhny federalny okrug), North Caucasian Federal District (Severo-Kavkazsky federalny okrug) and Volga Federal District (Privolzhsky federalny okrug)), San Marino, Serbia, Switzerland, Syria, Tunisia, Turkey and Ukraine
19.	Soil consisting in part of solid organic substances	Any third country other than EU Member States, Liechtenstein and Switzerland
20.	Growing medium, other than soil, consisting in whole or in part of solid organic substances, other than any composed entirely of peat or fibre of <i>Cocos nucifera</i> L., previously not used for growing of plants or for any agricultural purposes	Any third country other than EU Member States, Liechtenstein and Switzerland

# PART B

List of high-risk plants, plant products and other objects from third countries which may not be introduced into Great Britain pending a risk assessment

- **1.** Plants for planting, other than seeds, *in vitro* material and naturally or artificially dwarfed woody plants for planting, originating from any third country, other than EU Member States, Liechtenstein and Switzerland, and belonging to the following genera or species:
  - Acacia Mill.
  - Acer L.
  - Albizia Durazz.
  - *Alnus* Mill.

- Annona L.— Bauhinia L.— Berberis L.— Betula L.
- Caesalpinia L.
- Cassia L.
- Castanea Mill.
- Cornus L.
- Corylus L.
- Crataegus L.
- Diospyros L.
- Fagus L.
- Ficus carica L
- Fraxinus L.
- Hamamelis L.
- Jasminum L.
- Juglans L.
- Ligustrum L.
- Lonicera L.
- Malus Mill.
- Nerium L.
- Persea Mill.
- Populus L.
- Prunus L.
- Quercus L.
- Robinia L.
- Salix L.
- Sorbus L.
- Taxus L.
- Tilia L.
- Ulmus L.
- **2.** Plants of *Ullucus tuberosus* Loz., originating from any third country, other than EU Member States, Liechtenstein and Switzerland.
- **3.** Fruits of *Momordica* L. originating from any third country or area of a third country where *Thrips palmi* Karny is known to occur and where effective mitigation measures for that pest are lacking.
- **4.** Wood of *Ulmus* L. originating from any third country or area of a third country where *Saperda tridentata* Olivier is known to occur.

## PART C

Other plants, plant products and other objects from third countries which are subject to emergency control measures and may not be introduced into Great Britain

(1)	(2)
Description of plants, plant products or other objects	Third country, group of third countries or specific area of third country

- 1. Plants for planting, other than seeds, of Costa Rica and Honduras *Coffea*
- 2. Isolated bark of *Acer macrophyllum* The USA" Pursh, *Aesculus californica* (Spach) Nutt., *Lithocarpus densiflorus* (Hook. & Arn.) Rehd., *Quercus* spp. L. and *Taxus brevifolia* Nutt.

#### SCHEDULE 7

Regulation 10

New Annex 7 to the Phytosanitary Conditions Regulation

#### "ANNEX 7

List of plants, plant products and other objects originating from third countries and the corresponding special requirements for their introduction into Great Britain

## PART A

Plants, plant products and other objects originating in third countries which may only be introduced into Great Britain if special requirements are met

## Interpretation

#### In this Annex:

'associated controlled dunnage', in entry 109, 111, 112, 113, 120, 123, 125, 130, 132, 135, 136, 138 or 140 of Part A, means wood which supports a consignment of wood of a genus or species specified in that entry and which—

- is constructed from wood of the same type and quality as the wood in the consignment;
   and
- (ii) meets the requirements specified in column (3) of that entry;
- 'EPPO PM 9/2' means the standard describing a national regulatory control system for Clavibacter michiganensis subsp. sepedonicus that provides guidance on surveillance for

the pathogen and its containment and eradication if found, approved by the European and Mediterranean Plant Protection Organization(1);

'EPPO PM 9/5' means the standard describing the procedures for official control of Synchytrium endobioticum, approved by the European and Mediterranean Plant Protection Organization(2);

'EPPO PM 9/26' means the standard describing a national regulatory control system for Globodera pallida and Globodera rostochiensis, approved by the European and Mediterranean Plant Protection Organization(3):

'list of Xylella host plants' means the list, published by the national plant protection organisation of the United Kingdom from time to time, of plants that may host Xylella fastidiosa (Wells et al.).

(1) (2) (3) Description of Special requirements Origin plants, plant products or other objects

- medium, Any third country The plants must be accompanied by an 1. Growing attached or other than with Member associated States, (a) plants, intended to Liechtenstein sustain the vitality of Switzerland the plants, with the exception of sterile medium of in-vitro plants
  - EU official statement: that the growing medium at the

time of their planting:

- was free from soil and organic matter and had not been previously used for growing plants or for any other agricultural purposes,
- was composed entirely of peat or fibre of *Cocos* nucifera L. and had not been previously used for growing plants or for any other agricultural purposes.
- (iii) was subjected to effective fumigation or heat treatment\* to ensure freedom from pests, or
- (iv) was subjected to an effective systems approach\* to ensure freedom from pests, and in all the cases mentioned in points (i) to (iv) was

(1) (2) (3)

Description of plants, plant products or other objects

Origin Special requirements

stored and maintained under appropriate conditions to keep it free from GB quarantine pests, and

- (b) that since planting:
  - (i) appropriate measures have been taken to ensure that the growing medium has been kept free from GB quarantine pests, including at least:
    - (aa) physical isolation of the growing medium from soil and other possible sources of contamination,
    - (bb) hygiene measures,
    - (cc) using water free from GB quarantine pests, or
  - (ii) in the two weeks prior to export, the growing medium including, where appropriate, soil was completely removed by washing using water free from GB quarantine pests, and where replanting occurred, the the growing medium used met the requirements specified in point (a) and the measures described in point (b)(i) were taken to ensure that it remains free from GB quarantine pests.
- \* Details of the treatment or the use of a systems approach must also be included on the phytosanitary certificate under the heading "Additional declaration".
- 2. Machinery and Any third country vehicles which have other than EU been operated for Member States,

and Any third country The machinery or vehicles must be have other than EU accompanied by an official statement for Member States, that the machinery or vehicles have

(1) (2) (3) Description of Origin Special requirements plants, plant products or other objects agricultural or Liechtenstein and been cleaned and are free from soil and forestry purposes Switzerland plant debris. 3. Machinery and EU Member States. The machinery or vehicles must be vehicles which have Liechtenstein accompanied by an official statement for Switzerland that the machinery or vehicles have been operated agricultural been: or forestry purposes moved from an area established by the national plant protection organisation of the country of export in accordance with ISPM4 as an area that is free from Ceratocystis platani (Walter) Engelbrecht & Harrington, or in the case of machinery or (b) vehicles moved from an area infected with Ceratocystis platani (Walter) Engelbrecht & Harrington, they have been cleaned and made free from soil and plant debris prior to their movement out of the infected area 4. Plants for planting Any third country The plants must be accompanied by with roots, grown in an official statement that the place of open air production has been established by the national plant protection organisation accordance with ISPM10 as place of production that is free from Clavibacter sepedonicus (Spieckermann & Kotthoff) Li et al. and Synchytrium endobioticum (Schilbersky) Percival. 5. Plants for planting Any third country The plants must be accompanied by with roots, grown in other than an official statement that the plants EU Member States, originate from a field known to be open air Liechtenstein and free from Globodera pallida (Stone) Switzerland Behrens and Globodera rostochiensis (Wollenweber) Behrens. Plants for planting, Any third country The plants must be accompanied by an 6. other bulbs, other than EU official statement that they have been corms, rhizomes, Member States, grown in a nursery and: seeds, tubers, and Liechtenstein and (a) that they originate in: plants in tissue culture Switzerland an area\* established by the

Special requirements

- from Anisogramma anomala (Peck) E. Müller, or (b) an official statement that the plants have been grown in a nursery and that they originate in a place of production\*\* established by the national plant protection organisation in accordance with ISPM10 as a place of production that is free from Anisogramma anomala (Peck) E. Müller on the basis of official inspections carried out at the place of production and in its immediate vicinity since the beginning of the last three complete cycles of vegetation.
- \* The name of the area(s) must be included in the phytosanitary certificate under the heading "Additional declaration".
- \*\* The name of the place of production(s) must be included in the phytosanitary certificate under the heading "Additional declaration".
- 50. Plants, other than Belarus, fruit and seeds, of China, Fraxinus L., Juglans Democratic ailantifolia Carrière., People's Juglans mandshurica of Korea, Maximowicz., Ulmus Kazakhstan, davidiana Planchon. Mongolia, and rhoifolia Siebold & Russia, Zuccarini.
- Ukraine USA

Canada, The plants must be accompanied by the an official statement that the plants originate in an area established by the Republic national plant protection organisation Japan, in accordance with ISPM4 as an area that is free from *Agrilus planipennis* the Fairmaire and that no part of the Pterocarya Republic of Korea, area lies within 100 km of a known Taiwan, outbreak of Agrilus planipennis and the Fairmaire.

> A phytosanitary certificate may not include any such official statement unless the national plant protection organisation of the country of origin has previously provided the national plant protection organisation of the United Kingdom with written details of the area or areas.

(1) (2) (3)

Description of plants, plant products or other objects

Origin

Special requirements

51. Plants for planting, Any third country other than seeds, of Ulmus L.

The plants must be accompanied by an official statement that no symptoms of Candidatus Phytoplasma 'ulmi' Lee, Martini. Marcone & Zhu have been observed at the place of production or in the immediate vicinity of the place of production since the beginning of the last complete cycle of vegetation.

52. Plants, other than fruit Any third country and seeds, of Abies Mill. Larix Mill., Picea Mill. and Pinus L., over 3 m in height

The plants must be accompanied by an official statement that the plants originate in a place of production which has been established by the national plant protection organisation in accordance with ISPM10 as a place of production that is free from Ips duplicatus (Sahlberg).

53. Plants, other than fruit Any third country and seeds, of Abies Mill. Larix Mill., Picea Mill. and Pinus L. and Pseudotsuga Carrière., over 3 m in height

The plants must be accompanied by an official statement that the plants originate in a place of production which has been established by the national plant protection organisation in accordance with ISPM10 as a place of production that is free from Ips typographus L.

54. Plants, other than fruit Any third country and seeds, of Abies Mill. Larix Mill., Picea Mill. and Pinus L. over 3 m in height

The plants must be accompanied by an official statement that the plants originate in a place of production which has been established by the national plant protection organisation in accordance with ISPM10 as a place of production that is free from Ips amitinus (Eichhoff).

55. Plants, other than Any third country The plants: fruit or seeds, of where Abies Mill., Cedrus Bursaphelenchus Trew, Larix Mill., xylophilus (Steiner Picea Mill.., Pinus & Bührer) Nickle is L., Pseudotsuga Carr. known to occur and Tsuga Carr.

- must be accompanied by an official statement:
  - that they have been grown in places of production where Bursaphelenchus xylophilus (Steiner & Bührer) Nickle and its symptoms have not been observed since the beginning of the last complete growing cycle,

 $(1) \qquad \qquad (2) \qquad \qquad (3)$ 

Description of plants, plant products or other objects

Origin

Special requirements

- (ii) that they have been grown throughout their life under complete physical protection to prevent *Monochamus* spp. reaching the plants,
- (iii) that they have been officially inspected, tested and found free from any *Bursaphelenchus xylophilus* (Steiner & Bührer) Nickle and *Monochamus* spp., and
- (b) must only be transported from those places of production and through areas in which the pest is known to occur outside the flight season of *Monochamus* spp. or in closed containers or packaging to prevent infestation with *Bursaphelenchus xylophilus* (Steiner & Bührer) Nickle or *Monochamus* spp.
- 56. Plants of *Pinus* Any third country L. or *Pseudotsuga* where *Fusarium menziesii* (Mirbel) *circinatum* Franco Nirenberg & O'Donnell is known to occur

*Pinus* Any third country The plants must be accompanied by an *otsuga* where *Fusarium* official statement:

- (a) that the plants originate in a place of production which is registered and supervised by the national plant protection organisation and,
- (b) that they:
  - (i) have been grown throughout their life in a country where *Fusarium circinatum* Nirenberg & O'Donnell is known not to occur,
  - (ii) have been grown throughout their life in an area\* established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Fusarium circinatum Nirenberg & O'Donnell, or

 $(1) \qquad \qquad (2) \qquad \qquad (3)$ 

Description of plants, plant products or other objects

Origin

Special requirements

- (iii) originate in a place of production where no signs of Fusarium circinatum Nirenberg & O'Donnell, including its vicinity of at least 1 km radius, have been observed during official inspections carried out within a period of two years prior to export and that they were tested immediately prior to export for Fusarium circinatum Nirenberg & O'Donnell.
- \* The name of the area(s) must be included in the phytosanitary certificate under the heading "Additional declaration".

57. Plants for planting, Any third country other than seeds, of *Cedrus* Trew and *Pinus* L.

The plants must be accompanied by:

- (a) an official statement that the plants have been grown throughout their life in a place of production in a country in which *Thaumetopoea pityocampa* (Denis & Schiffermüller) is not known to occur,
- (b) an official statement that the plants have been grown throughout their life in an area\* established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Thaumetopoea pityocampa* (Denis & Schiffermüller),
- (c) an official statement that the plants have been produced in nurseries which, along with their vicinity, have been found free from *Thaumetopoea pityocampa* (Denis & Schiffermüller) on the basis of official inspections and official surveys carried out at appropriate times, or

been observed on the plants at the place of production during official inspections, including laboratory testing of any suspicious symptoms, carried out at least twice during the growing season at appropriate times when the plants were in active growth and with an intensity which took into account the particular production system of the plants, or

- (c) where signs of *Phytophthora* ramorum Werres, De Cock & Man in 't Veld have been found on the plants at the place of production, an official statement that appropriate procedures have been implemented for the purpose of eradicating that pest and the plants have been found free from the pest following those procedures, which consisted of at least:
  - (i) destruction of the infected plants and all susceptible plants within a 2 m radius of the infected plants, including associated growing media and plant debris,
  - (ii) in the case of plants listed in column (1) of this entry within a 10 m radius of the infected plants and any remaining plants from the infected lot:
    - (aa) they have been retained at the place of production,
    - (bb) additional official inspections have been carried out at least twice in the three months after the eradication measures have been taken when the plants are in active growth,

(1)	(2)	(3)
Description of plants, plant products or other objects	Origin	Special requirements

- (cc) no treatments that may suppress symptoms of the plant pest have been carried out in that three month period, and
- (dd) the plants have been found free from the pest on these official inspections,
- (iii) in the case of all other plants listed in column (1) of this entry at the place of production, the plants have been subjected to intensive official re-inspection and have been found free from the pest on those inspections,
- (iv) appropriate phytosanitary measures have been taken on the growing surface within a 2 m radius of infected plants.
- \* The name of the area(s) must be included in the phytosanitary certificate under the heading "Additional declaration".
- 2. other than seeds, which where belong to the genera fastidiosa (Wells et (a) and species listed in al.) is known not the list of Xylella host to be present, other (b) plants

than EU Member States, Liechtenstein and Switzerland

Plants for planting, Any third country The plants must be accompanied by an Xylella official statement

> that Xylella fastidiosa (Wells et al.) is not present in the country, in the case of plants, other than seeds, intended for planting, of Coffea, Lavandula dentata L., Nerium oleander L., Olea europaea L., Polygala myrtifolia L., or *Prunus dulcis* (Mill.) D.A. Webb, that they have been grown in a site that is subject to annual official inspection, with sampling and testing carried out at the appropriate times on those plants for the presence of Xylella fastidiosa (Wells et al.) and in accordance with international

(1)	(2)	(3)
Description of plants, plant products or other objects	Origin	Special requirements

standards, using a sampling scheme able to identify with 99% reliability the level of presence of infected plants of 5%, in which the absence of Xylella fastidiosa (Wells et al.) was confirmed, and

in the case of plants, other than seeds, intended for planting, of Polygala myrtifolia L., that prior to their movement out of their production site and as close to that time as possible, each lot of plants was subjected in addition to official visual inspection and sampling, as well as testing, in line with international standards for the presence of Xylella fastidiosa (Wells et al.), using a sampling scheme able to identify with 99% reliability the level of presence of infected plants of 5%, in which the absence of Xylella fastidiosa (Wells et al.) was confirmed.

A phytosanitary certificate may not include any such official statement unless the national plant protection organisation of the country of origin has notified the national plant protection organisation of the United Kingdom in writing that Xylella fastidiosa (Wells et al.) is not present in the country.

3. Plants for planting, Any third country The plants must be accompanied by: other than seeds, which where belong to the genera fastidiosa (Wells et and species listed in al.) is known to the list of *Xylella* host be plants

Xylella (a) present, other than EU Member States, Liechtenstein and Switzerland

- in the case of plants originating in an area which has been established by the national plant protection organisation in accordance with ISPM4 as as area\* that is free from Xylella fastidiosa (Wells et al.), an official statement that they originate in such an area,
- (b) in the case of plants which originate in an area where Xylella fastidiosa (Wells et al.) is known to be present and have not been

(1)	(2)	(3)

grown for their entire production cycle *in vitro*, an official statement:

- (i) that the plants have been produced in a site\*\*:
  - (aa) that is authorised by the national plant protection organisation in accordance with ISPM10 as a site that is free from *Xylella fastidiosa* (Wells et al.) and its vectors,
  - (bb) that is physically protected against the introduction of *Xylella fastidiosa* by its vectors,
  - (cc) that is surrounded by a zone with a width of 100 m which has been subject to official inspections twice a year and where all of the plants found to be infected with, or to have symptoms of, Xylella fastidiosa (Wells et al.) have been immediately removed and appropriate phytosanitary treatments against the vectors of Xylella fastidiosa (Wells et al.) have been applied before that removal,
  - (dd) that at appropriate times throughout the year, is subject to phytosanitary treatments to maintain freedom from the vectors of *Xylella fastidiosa* (Wells et al.), including the removal of plants,

(1)	(2)	(3)
Description of plants, plant products or other objects	Origin	Special requirements

- (ee) that is subject annually, together with the zone referred to in point (cc), to at least two official inspections during the flight season of the vectors of *Xylella fastidiosa* (Wells et al.),
- (ff) where throughout the production time of the plants, neither symptoms of *Xylella fastidiosa* (Wells et al.) nor its vectors were found in the site or if suspect symptoms were observed, testing was carried out and the absence of *Xylella fastidiosa* (Wells et al.) confirmed, and
- (gg) where throughout the production time of the plants, no symptoms of *Xylella fastidiosa* (Wells et al.) were found in the zone referred to in point (cc) or if suspect symptoms were observed, testing was carried out and the absence of *Xylella fastidiosa* (Wells et al.) confirmed,
- (ii) that representative samples of each species of the plants from the site have been subject to annual testing, at the most appropriate time, and the absence of *Xylella fastidiosa* (Wells et al.) has been confirmed on the basis of tests carried out in accordance with internationally validated testing methods,

(1)	(2)	(3)
Description of plants, plant products or other objects	Origin	Special requirements

- (iii) that the plants have been transported in closed containers or packaging, to prevent infection with *Xylella fastidiosa* (Wells et al.) or any of its known vectors,
- (iv) that as practically close to the time of export as possible, the lots of the plants were subject to official visual inspection, sampling and molecular testing, carried out in accordance with internationally validated testing methods, using a sampling scheme able to identify with 99% reliability the level of presence of infected plants of 1% and targeting in particular plants displaying symptoms of Xylella fastidiosa (Wells et al.), which confirmed the absence of Xylella fastidiosa (Wells et al.), and
- (v) that immediately prior to export, the lots of the plants were subject to phytosanitary treatments against any known vectors of *Xylella fastidiosa* (Wells et al.), or
- (c) in the case of plants which originate in an area where *Xylella fastidiosa* (Wells et al.) is known to be present and have been grown for their entire production cycle *in vitro*, an official statement:
  - (i) that the plants have been grown in a site\*\* of production:
    - (aa) that is authorised by the national plant protection organisation in the country of origin in accordance with ISPM10 as site of production that is free

(1)	(2)	(3)
(1)	(2)	(3)
Description of plants, plant products or other objects	Origin	Special requirements

- from *Xylella fastidiosa* (Wells et al.) and its vectors,
- (bb) that is physically protected against the introduction of *Xylella fastidiosa* (Wells et al.) by its vectors,
- (cc) that is subjected
  annually to at
  least two official
  inspections carried out
  at appropriate times,
  and
- (dd) where throughout the production time of the plants, neither symptoms of *Xylella fastidiosa* (Wells et al.) nor its vectors were found in the site or, if suspect symptoms were observed, testing was carried out, and the absence of *Xylella fastidiosa* (Wells et al.) confirmed,
- (ii) that the plants have been transported under sterile conditions in a transparent container that precludes the possibility of infection by *Xylella fastidiosa* (Wells et al.) through its vectors, and
- (iii) that the plants have been grown from seeds, propagated under sterile conditions from mother plants which have spent their entire lives in an area free from *Xylella fastidiosa* (Wells et al.) and have been tested and found free from *Xylella fastidiosa* (Wells et al.) or have been propagated under sterile conditions from mother plants which have

(1)	(2)	(3)
Description of plants, plant products or other objects	Origin	Special requirements

been grown in a site which meets the requirements in point (b)(i) and have been tested and found free from Xylella fastidiosa (Wells et al.).

A phytosanitary certificate may not include any of the official statements referred to in point (a) to (c) unless the national plant protection organisation in the country of origin has previously provided the national plant protection organisation of the United Kingdom with written details of the area(s) or the site(s) (as the case may be).

- \* The name of the area(s) must be included in the phytosanitary certificate under the heading "Additional declaration".
- \*\* The name of the site(s) must be included in the phytosanitary certificate under the heading "Additional declaration".
- 4. other than seeds, which Liechtenstein belong to the genera Switzerland and species listed in the list of Xylella host plants and have never been grown in an area where Xylella fastidiosa (Wells et al.) is known to occur

and (a)

Plants for planting, EU Member States, The plants must be accompanied by:

- an official statement that they have been grown in a site that is subject to annual official inspection, and in the case of symptoms of *Xylella* fastidiosa (Wells et al.), sampling, taking into account the technical guidelines for the survey of Xylella fastidiosa (Wells et al.) published by the European Commission from time to time(6), and testing in line with international standards for the presence of Xylella fastidiosa (Wells et al.), in which the absence of Xylella fastidiosa (Wells et al.) was confirmed, or
- in the case of plants for planting, (b) other than seeds, of Coffea,

<sup>(6)</sup> https://www.efsa.europa.eu/en/supporting/pub/en-1873.

(1)	(2)	(3)
Description of plants, plant products or other objects	Origin	Special requirements

Lavandula dentata L., Nerium oleander L., Olea europaea L., Polygala myrtifolia L. and Prunus dulcis (Mill.) D.A. Webb, an official statement:

- that they have been grown in a site that is subject to annual official inspection and sampling, taking into account the technical guidelines for the survey of Xylella fastidiosa (Wells et al.) published by the European Commission from time to time, and testing in line with international standards for the presence of *Xylella* fastidiosa (Wells et al.), using a sampling scheme able to identify with 99% reliability the level of presence of infected plants of 5%, in which the absence of Xylella fastidiosa (Wells et al.) was confirmed, and
- (ii) in respect of any plants for planting, other than seeds, of Polygala myrtifolia L., that prior to their movement out of their production site and as close to that time as possible, each lot of plants was subjected in addition to official visual inspection and sampling, as well as testing, in line with international standards for the presence of Xylella fastidiosa (Wells et al.), using a sampling scheme able to identify with 99% reliability the level of presence of infected plants of 5%, in which the absence of Xylella fastidiosa (Wells et al.) was confirmed.

(1) (2) (3) Description of Origin Special requirements plants, plant products or other objects

> For the purposes of point (b), the presence of Xylella fastidiosa (Wells et al.) must have been screened by one test, and in the case of positive results, its presence must have been identified by carrying out, in line with international standards, at least one positive molecular test.

5. other than seeds, which Liechtenstein belong to the genera Switzerland and species listed in the list of Xylella host plants and have been grown for at least part of their life in an area in the European Union. Liechtenstein or Switzerland where Xylella fastidiosa (Wells et al.) is known to occur

Plants for planting, EU Member States, In the case of plants which have not been and grown for their entire production cycle in vitro, the plants must:

- (a) be accompanied by an official statement:
  - that they have been grown in a site that:
    - (aa) is registered and authorised by the national plant protection organisation in the country of origin in accordance with ISPM10 as a site that is free from Xylella fastidiosa (Wells et al.) and its vectors, and is physically protected against the introduction of Xylella fastidiosa (Wells et al.) by its vectors,
    - (bb) is surrounded by a zone with a width of 100 m which has been subject to official inspections twice a year and where all of the plants found to be infected with, or to have symptoms of, Xylella fastidiosa (Wells et al.) have been immediately removed and appropriate phytosanitary treatments against the vectors of Xylella fastidiosa (Wells et

(1)	(2)	(3)
Description of plants, plant products or other objects	Origin	Special requirements

- al.) have been applied before that removal,
- (cc) is subject to phytosanitary treatments, which may include the removal of plants, at appropriate times of the year to maintain freedom from vectors of *Xylella fastidiosa* (Wells et al.),
- (dd) is subject annually, together with the zone referred to in point (bb) to at least two official inspections, taking into account the technical guidelines for the survey of *Xylella fastidiosa* (Wells et al.) published by the European Commission from time to time,
- (ee) where throughout the time of growth of the plants, neither symptoms of *Xylella fastidiosa* (Wells et al.) nor its vectors were found in the site or, if suspect symptoms were observed, tests were carried out confirming the absence of *Xylella fastidiosa* (Wells et al.), and
- (ff) where throughout the time of growth of the plants, no symptoms of *Xylella fastidiosa* (Wells et al.) were found in the zone referred to in point (bb) or, if suspect symptoms were observed, testing has been undertaken and absence of *Xylella*

(1) (2) (3)

Description of Origin Special requirements plants, plant products or other objects

fastidiosa (Wells et al.) confirmed,

- (ii) that representative samples of each species of the plants from the site have been subject to annual testing, at the most appropriate time, and the absence of *Xylella fastidiosa* (Wells et al.) has been confirmed on the basis of tests carried out in accordance with internationally validated testing methods,
- (iii) that as practically close to the time of export as possible, the lots of the plants were subject to official visual inspection, sampling and molecular testing, carried out in accordance with internationally validated testing methods, using a sampling scheme able to identify with 99% reliability a level of presence of infected plants of 1% or above and targeting in particular plants displaying symptoms of Xylella fastidiosa (Wells et al.), in accordance with ISPM31,
- (iv) that prior to their movement from the area, the lots of the plants were subject to phytosanitary treatments against the vectors of *Xylella fastidiosa* (Wells et al.), and
- (b) be moved in closed containers or packaging from the area to prevent infection with *Xylella fastidiosa* (Wells et al.) or any of its vectors.

In the case of dormant plants, other than seeds, of *Vitis* intended for planting, the plants must:

 (1)	(2)	(2)
(1)	(2)	(3)
Description of plants, plant products or other objects	Origin	Special requirements

- (a) be accompanied by an official statement:
  - (i) that they have been grown in a site that is registered by the national plant protection organisation in the country of origin and that as practically close to the time of export as possible, the plants have undergone an appropriate thermotherapy treatment in an authorised treatment facility authorised and supervised by that national plant protection organisation for that purpose, where the dormant plants were submerged for 45 minutes in water heated to 50°C in accordance with EPPO PM 10/18, and
  - (ii) that prior to their movement from the area, the lots of the plants were subject to phytosanitary treatments against the vectors of *Xylella fastidiosa* (Wells et al.), and
- (b) be transported in closed containers or packaging from the area to prevent infection with *Xylella fastidiosa* (Wells et al.) or any of its vectors.

In addition, the plants must not have been moved through any other area where *Xylella fastidiosa* is known to occur unless they were transported into and through the area in

(1)	(2)	(3)
Description of plants, plant products or other objects	Origin	Special requirements

closed containers or packaging to prevent infection with *Xylella fastidiosa* (Wells et al.) or any of its vectors,

- (c) in the case of plants which originate in an area where *Xylella fastidiosa* (Wells et al.) is known to be present and have been grown for their entire production cycle *in vitro*, an official statement that:
  - (i) the plants have been grown in a site\*\* of production:
    - (aa) that is
      authorised by
      the national
      plant protection
      organisation
      in the country
      of origin in
      accordance with
      ISPM10 as a site
      of production
      that is free
      from Xylella
      fastidiosa (Wells
      et al.) and its
      vectors,
    - (bb) that is physically protected against the introduction of *Xylella fastidiosa* (Wells et al.) by its vectors,
    - (cc) that is subjected annually to at least two official inspections carried out at appropriate times, and
    - (dd) where throughout

(1) (2) (3)

Description of Origin Special requirements plants, plant products or other objects

the production time of the plants, neither symptoms of Xylella fastidiosa (Wells et al.) nor its vectors were found in the site or, if suspect symptoms were observed, testing has been undertaken and the absence of Xylella fastidiosa (Wells et al.) confirmed,

- (ii) that the plants have been transported under sterile conditions in a transparent container that precludes the possibility of infection by *Xylella fastidiosa* (Wells et al.) by its vectors, and
- (iii) that the plants have been grown from seeds, propagated under sterile conditions from mother plants which have spent their entire lives in an area free from Xylella fastidiosa (Wells et al.) and have been tested and found free from Xylella fastidiosa (Wells et al.) or have been propagated under sterile conditions from mother plants which have been grown in a site which meets the requirements in point (c) (i) and have been tested and found free from

(1)		(2)	(3)
plan	cription of ats, plant ducts or other acts	Origin	Special requirements

*Xylella fastidiosa* (Wells et al.).

In the second paragraph, in point (a)(i), 'EPPO PM 10/18' means the standard describing a long-duration hot water treatment of grapevine material against flavescence dorée phytoplasma, approved by the European and Mediterranean Plant Protection Organization(7).

6. Seeds of *Solanum* Any third country *lycopersicum* L. and *Capsicum* spp., intended for planting

The seeds must be accompanied by:

- (a) an official statement that they are of *Capsicum* spp. varieties which are known to be resistant to Tomato brown rugose fruit virus, or
- (b) an official statement:
  - that the mother plants of seeds have been produced in a production site\* where Tomato brown rugose fruit virus is known not to occur on the basis of official inspections carried out at the appropriate time to detect that pest, and
  - (ii) that the seeds or their mother plants have undergone official sampling and testing for Tomato brown rugose fruit virus and have been found, according to those tests, to be free from that pest.

\*The name of the site(s) of production must be included in the phytosanitary certificate under the heading "Additional declaration".

For the purposes of point (b)(ii), the official sampling and testing of the seeds

<sup>(7)</sup> Approved by the European and Mediterranean Plant Protection Organization in September 2012 and available from its Secretariat at 21 Boulevard Richard Lenoir, 75011, Paris, France and at https://onlinelibrary.wiley.com/doi/epdf/10.1111/epp.2594.

 (1)	(2)	(3)
Description of plants, plant products or other objects	Origin	Special requirements
		must be carried out in accordance with the paragraphs below.
		The official sampling of seeds for testing must be carried out in accordance with the following sampling schemes referred to in the relevant table of ISPM31:
		—in the case of seed lots which include 3000 or fewer seeds, a hypergeometric sampling scheme that is able to identify with 95% reliability a level of presence of infected plants of 10% or above,
		—in the case of seed lots which include 30000 or fewer seeds, but more than 3000 seeds, a sampling scheme that is able to identify with 95% reliability a level of presence of infected plants of 1% or above,
		—in the case of seed lots which include more than 30000 seeds, a sampling scheme that is able to identify with 95% reliability a level of presence of infected plants of 0.1% or above.
		Sub samples must consist of nor more tha 1000 seeds for Polymerase Chain Reaction (PCR) methods.
		The testing of seeds must be carried out using one of the following methods and the method used must be included in the phytosanitary certificate under the heading "Additional declaration":
		—real-time RT-PCR using the primers and probes described in the ISF protocol (2020), or
		—real-time RT-PCR using primers and probe of Menzel and Winter (Acta Horticulturae, in press).

(1)	(2)	(3)
Description of plants, plant products or other objects	Origin	Special requirements

7. Plants for planting of Any third country *Solanum lycopersicum*L. and *Capsicum* spp.

The plants must be accompanied by:

- (a) an official statement that they are of *Capsicum* spp. varieties which are known to be resistant to Tomato brown rugose fruit virus, or
- (b) an official statement that:
  - (i) the plants are derived from seeds which have undergone sampling and testing for Tomato brown rugose fruit virus in the manner set out in column (3) of entry 6 which has shown them to be free from that pest, and
  - the plants have been (ii) produced in a production site\* which is registered and supervised by the national plant protection organisation in the country of origin and is known to be free from Tomato brown rugose fruit virus on the basis of official inspections carried out at the appropriate time to detect that pest, and where the plants have shown symptoms of Tomato brown rugose fruit virus, the plants have undergone official sampling and testing for Tomato brown rugose fruit virus and have been found, according to those tests, to be free from that pest.

\*The name of the site(s) of production must be included in the phytosanitary certificate under the heading "Additional declaration".

For the purposes of point (b)(ii), the official sampling and testing of the seeds must be carried out in accordance with the paragraphs below.

(1)	(2)	(3)
Description of plants, plant products or other objects	Origin	Special requirements
		In the case of plants for planting, 200 leaves must be collected per site of production and cultivar.
		In case of symptomatic plants, sampling for testing must be performed on at least 3 symptomatic leaves.
		One of the following testing methods must be carried out for the detection of Tomato brown rugose fruit virus:
		—in the case of symptomatic material only, ELISA,
		—conventional RT-PCR using the primers of Alkowni et al. (2019),
		—conventional RT-PCR using the primers of Rodriguez-Mendoza et al. (2019),
		—real-time RT-PCR using the primers and probes described in the ISF protocol (2020),
		—real-time RT-PCR using primers and probe of Menzel and Winter (Acta Horticulturae, in press).
		In case of a positive result of the detection test, a second testing method, different from the one used for detection, must be carried out with one of the RT-PCR methods mentioned above, using the same sample to confirm the identification."

#### **SCHEDULE 8**

Regulation 11

New Annex 8 to the Phytosanitary Conditions Regulation

#### "ANNEX 8

List of plants, plant products and other objects originating in a CD territory or Great Britain and the special requirements for their introduction into Great Britain from a CD territory or their movement within Great Britain

## PART A

List of plants, plant products and other objects originating in a CD territory or Great Britain and the special requirements for their introduction into Great Britain from a CD territory or their movement within Great Britain

### Interpretation

In this Part—

'relevant PCN provisions' means-

- (i) in relation to potatoes produced in England, Part 4 of Schedule 2 to the Official Controls (Plant Health and Genetically Modified Organisms) (England) Regulations 2019(8);
- (ii) in relation to potatoes produced in Wales, Part 4 of Schedule 2 to the Official Controls (Plant Health and Genetically Modified Organisms) (Wales) Regulations 2020(9);
- (iii) in relation to potatoes produced in Scotland, paragraphs 4 and 5 of Part 2, and Part 4, of Schedule 2 to the Plant Health (Official Controls and Miscellaneous Provisions) (Scotland) Regulations 2019(10);

'relevant Potato Wart Disease provisions' means-

- (i) in relation to potatoes produced in England, Part 3 of Schedule 2 to the Official Controls (Plant Health and Genetically Modified Organisms) Regulations 2019;
- (ii) in relation to potatoes produced in Wales, Part 3 of Schedule 2 to the Official Controls (Plant Health and Genetically Modified Organisms) (Wales) Regulations 2020;
- (iii) in relation to potatoes produced in Scotland, Part 3 of Schedule 2 to the Plant Health (Official Controls and Miscellaneous Provisions) (Scotland) Rgulations 2019.

-		(1)	(2)
		Description of plants, plant products or other objects	Special requirements
1	•	Plants for planting with roots, grown in the open air	There must be evidence that the place of production is known to be free from <i>Synchytrium endobioticum</i> (Schilbersky) Percival.

<sup>(8)</sup> S.I. 2019/1517 to which there are amendments not relevant to these Regulations.

<sup>(9)</sup> S.I. 2020/206 (W. 48).

<sup>(10)</sup> S.S.I. 2019/421, amended by S.S.I. 2020/152, 176.

(1) (2)

Description of plants, plant products or other objects

Special requirements

- Plants for planting of stolon, or The plants must be accompanied by an collections
  - tuber-forming species of *Solanum* official statement that the plants have L., or their hybrids, being stored been held under quarantine conditions in gene banks or genetic stock and have been found free from any GB quarantine pests by laboratory testing, as described in entry 3, before release from quarantine.

3. Plants for planting of stolon or tuber-forming species of Solanum L., or their hybrids, other than:

- those tubers of *Solanum* tuberosum L. specified in entries 4, 5 and 6; and
- seeds of Solanum tuberosum L. specified in entry 18

Each organisation or research body holding such material must inform the competent authority of the material held.

The plants must be accompanied by an official statement that they have been held under quarantine conditions and:

- have been found free from GB quarantine pests by laboratory testing before release from quarantine, using methods described in EPPO PM 3/21, which was:
  - supervised by the competent authority and executed by scientifically trained staff of that authority or of any officially approved body,
  - (ii) executed at a site provided with appropriate facilities sufficient to contain GB quarantine pests and maintain the material, including indicator plants, in such a way as to eliminate any risk of spreading GB quarantine pests;
  - (iii) executed on each unit of the material:
    - (aa) by visual examination at regular intervals during the full length of at least one vegetative cycle, having regard to the type of material and its stage of development during the testing programme, for symptoms caused by any GB quarantine pests, and
    - (bb) by laboratory testing:

(1) (2)

Description of plants, plant Special requirements products or other objects

- in the case of all potato material at least for:
- Andean potato latent virus,
- Andean potato mild mottle virus,
- Andean potato mottle virus,
- Arracacha virus B. oca strain,
- Potato black ringspot virus,
- Potato virus T,
- Potato yellowing virus,
- Potato yellow vein virus,
- non-European
   isolates of potato
   viruses A, M, S, V,
   X and Y (including
   Yo, Yn and Yc)
   and Potato leafroll
   virus (including
   Yo),
- Clavibacter
   sepedonicus
   (Spieckermann &
   Kotthoff) Li et al.,
- Ralstonia
  solanacearum
  (Smith) Yabuuchi
  et al. emend. Safni
  et al., Ralstonia
  pseudosolanacearum
  Safni et al.,
  Ralstonia syzygii
  subsp. celebensis
  Safni et al.
  and Ralstonia
  syzygii subsp.
  indonesiensis Safni
  et al.,
- in the case of seeds of *Solanum tuberosum* L., other than those specified in entry

(1) (2) Description of plants, plant Special requirements products or other objects 18, at least for the viruses and viroids listed above, with the exception of Andean potato mottle virus, and non-European isolates of potato viruses A, M, S, V, X and Y (including

> (iv) included appropriate testing on any other symptoms observed in the visual examination in order to identify the GB quarantine pests having caused such symptoms.

Yo, Yn and Yc) and Potato leafroll

virus, and

In point (a), 'EPPO PM 3/21' means the standard describing inspection and tests for detection of pests infecting Solanum species or hybrids imported for germplasm, conservation, breeding or research purposes in post-entry quarantine, approved by the European and Mediterranean Plant Protection Organization(11).

4. planting, originating in Great Britain

Tubers of Solanum tuberosum L., for The tubers must be accompanied by an official statement that the relevant Potato Wart provisions to combat Synchytrium endobioticum (Schilbersky) Percival have been complied with.

5.

Tubers of Solanum tuberosum L., for The tubers must be accompanied by an planting, originating in Great Britain official statement that they originate in an area in which Ralstonia solanacearum (Smith) Yabuuchi et al. emend. Safni et al.:

- (a) is known not to occur; or
- (b) is known to occur, and the tubers originate from a place of production found free from

<sup>(11)</sup> First approved by the European and Mediterranean Plant Protection Organization in September 1983 and available from its Secretariat at 21 Boulevard Richard Lenoir, 75011, Paris, France and at https://onlinelibrary.wiley.com/doi/epdf/10.1111/ epp.12613.

(1) (2)

lycopersicum L., Musa L., Nicotiana L. and Solanum melongena L.

Special requirements

- accordance with the measures specified in ISPM4, is known to be free from Ralstonia solanacearum (Smith) Yabuuchi et al. emend. Safni et al., or
- (b) an official statement that no symptoms of Ralstonia solanacearum (Smith) Yabuuchi et al. emend. Safni et al. have been observed on the plants at the place of production since the beginning of the last complete cycle of vegetation.
- Fragaria L., other than those which been complied with. are authorised to be planted for the purposes of this entry by the competent authority, originating in Great Britain

Plants for planting with roots grown There must be evidence that the relevant in the open air of Allium porrum PCN provisions to combat Globodera L., Asparagus officinalis L., Beta pallida (Stone) Behrens and Globodera vulgaris L., Brassica spp. and rostochiensis (Wollenweber) Behrens have

- 15. territory
  - Plants for planting with roots grown The plants must be accompanied by an in the open air of Allium porrum official statement that they originate in an L., Asparagus officinalis L., Beta area in which Globodera pallida (Stone) vulgaris L., Brassica spp. and Behrens and Globodera rostochiensis Fragaria L., originating in a CD (Wollenweber) Behrens are known not to occur.
- spp., Iris spp., Lilium spp., Narcissus been complied with. L. or Tulipa L., other than those which are authorised to be planted for the purposes of this entry by the competent authority, originating in Great Britain
- Bulbs, tubers or rhizomes, grown in There must be evidence that the relevant the open air, of Allium ascalonicum PCN provisions to combat Globodera L., Allium cepa L., Dahlia spp., pallida (Stone) Behrens and Globodera Gladiolus Tourn. ex L., Hyacinthus rostochiensis (Wollenweber) Behrens have
- L. or *Tulipa* L., originating in a CD occur. territory

Bulbs, tubers or rhizomes, grown in The plants must be accompanied by an the open air, of Allium ascalonicum official statement that they originate in an L., Allium cepa L., Dahlia spp., area in which Globodera pallida (Stone) Gladiolus Tourn. ex L., Hyacinthus Behrens and Globodera rostochiensis spp., Iris spp., Lilium spp., Narcissus (Wollenweber) Behrens are known not to

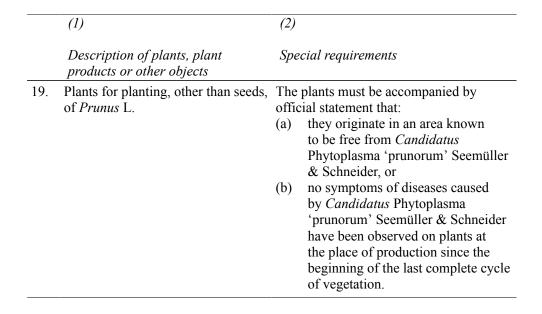

(1) (2)

Description of plants, plant Special requirements products or other objects

18. Seeds of *Solanum tuberosum* L., other than those specified in entry 2

The seeds must be accompanied by an official statement:

- (a) that they derive from plants which comply with the requirements set out in entries 4 to 6, 8 and 9, and
- (b) that they:
  - (i) originate in an area known to be free from *Synchytrium endobioticum* (Schilbersky) Percival and *Ralstonia solanacearum* (Smith) Yabuuchi *et al.* emend. Safni *et al.*; or
  - (ii) comply with all of the following requirements:
    - (aa) they have been produced in a site where, since the beginning of the last cycle of vegetation, no symptoms of disease caused by the GB quarantine pests referred to in point (b)(i) have been observed;
    - (bb) they have been produced at a site where all of the following actions have been taken: -staff and other items, such as tools, machinery, vehicles, vessels and packaging material, from other sites producing solanaceous plants have been prevented from coming into contact with the site or other appropriate hygiene measures have been taken to prevent infection by staff working, or items used, at other sites producing solanaceous plants, and -only water free from all GB quarantine pests referred to point (b)(i) has been used

### PART B

List of plants, plant products or other objects originating in a CD territory or Great Britain that are subject to emergency measures and may only be introduced into Great Britain from a CD territory or moved within Great Britain if special requirements are met

In this Part, "ISPM 31" has the same meaning as in Part B of Annex 7.

(1) (2) Description of plants, plant products or *Special requirements* other objects

1. Plants for planting, other than seeds, The plants must be accompanied by: of Viburnum spp. L., Camellia spp. L. (a) and Rhododendron spp. L., other than Rhododendron simsii Planch,

- an official statement that the plants originate in an area in which Phytophthora ramorum Werres, De Cock & Man in 't Veld is known not to occur, an official statement that since the beginning of the last complete cycle of
- vegetation no signs of *Phytophthora* ramorum Werres, De Cock & Man in 't Veld have been observed on the plants at the place of production during official inspections, including laboratory testing of any suspicious symptoms, carried out at least twice during the growing season at appropriate times when the plants were in active growth and with an intensity which took into account the particular production system of the plants, or
- where signs of *Phytophthora ramorum* Werres, De Cock & Man in 't Veld have

(1) (2)

Description of plants, plant products or other objects

Special requirements

been found on the plants at the place of production, an official statement that appropriate procedures have been implemented for the purpose of eradicating that pest and the plants have been found free from the pest following those procedures, which consisted of at least:

- (i) destruction of the infected plants and all susceptible plants within a 2 m radius of the infected plants, including associated growing media and plant debris,
- in the case of plants listed in column (1) of this entry within a 10 m radius of the infected plants and any remaining plants from the infected lot:
  - (aa) they have been retained at the place of production,
  - (bb) additional official inspections have been carried out at least twice in the three months after the eradication measures have been taken when the plants are in active growth,
  - (cc) no treatments that may suppress symptoms of the pest have been carried out in that three month period, and
  - (dd) the plants have been found free from the pest on these official inspections,
- (iii) in the case of all other plants listed in column (1) of this entry at the place of production, the plants have been subjected to intensive official re-inspection and have been found free from the pest on those inspections, and
- appropriate phytosanitary measures have been taken on the growing surface within a 2 m radius of infected plants.
- 2. Capsicum spp., intended for planting, statement: other than plants for planting of *Capsicum* (a) spp. varieties which are known to be
- Seeds of Solanum lycopersicum L. and The seeds must be accompanied by an official
  - that the mother plants of seeds have been produced in a production site where

(1) (2)

Description of plants, plant products or other objects

Special requirements

resistant to Tomato brown rugose fruit virus

- Tomato brown rugose fruit virus is known not to occur on the basis of official inspections carried out at the appropriate time to detect that pest,
- (b) that the seeds or their mother plants have undergone sampling and testing for Tomato brown rugose fruit virus by the competent authority, or have been subjected to sampling and testing by professional operators under official supervision of the competent authority, and have been found, according to those tests, to be free from that pest, and
- (c) in the case of any seeds which were in storage prior to 15th August 2020, that the seeds have been sampled and tested for Tomato brown rugose fruit virus by the competent authority and found in those tests to be free from that pest.

For the purposes of point (b), the sampling and testing of the seeds must be carried out in accordance with the paragraphs below.

The official sampling of seeds for testing must be carried out in accordance with the following sampling schemes referred to in the relevant table of ISPM31:

- —in the case of seed lots which include 3000 or fewer seeds, a hypergeometric sampling scheme that is able to identify with 95% reliability a level of presence of infected plants of 10% or above.
- —in the case of seed lots which include 30000 or fewer seeds, but more than 3000 seeds, a sampling scheme that is able to identify with 95% reliability a level of presence of infected plants of 1% or above,
- —in the case of seed lots which include more than 30000 seeds, a sampling scheme that is able to identify with 95% reliability a level of presence of infected plants of 0.1% or above.

Sub samples must consist of no more than 1000 seeds for Polymerase Chain Reaction (PCR) methods.

(1) (2) Description of plants, plant products or Special requirements other objects The testing of seeds must be carried out using one of the following methods and the method used must be included in the phytosanitary certificate under the heading "Additional declaration": —real-time RT-PCR using the primers and probes described in the ISF protocol (2020), or —real-time RT-PCR using primers and probe of Menzel and Winter (Acta Horticulturae, in press). 3. Solanum The plants must be accompanied by an official planting of lycopersicum L. and Capsicum spp., other statement: than plants for planting of *Capsicum* spp. that the plants are derived from seeds varieties which are known to be resistant which have undergone sampling and to Tomato brown rugose fruit virus testing for Tomato brown rugose fruit virus in the manner set out in column (2) of entry 2 which has shown them to be free from that pest, and that the plants have been produced in a production site where Tomato brown rugose fruit virus is known not to occur on the basis of official inspections carried out at the appropriate time to detect that pest, and, where the plants have shown symptoms of Tomato brown rugose fruit virus, the plants have undergone official sampling and testing for Tomato brown rugose fruit virus and have been found, according to those tests, to be free from that pest. For the purposes of point (b)(ii), the sampling and testing of the seeds must be carried out in accordance with the paragraphs below. In the case of plants for planting, 200 leaves must be collected per site of production and cultivar. In case of symptomatic plants, sampling for testing must be performed on at least 3 symptomatic leaves. One of the following testing methods must be

rugose fruit virus:

carried out for the detection of Tomato brown

(1)	(2)
Description of plants, plant products or other objects	Special requirements
	—in the case of symptomatic material only, ELISA,
	—conventional RT-PCR using the primers of Alkowni et al. (2019),
	—conventional RT-PCR using the primers of Rodriguez-Mendoza et al. (2019),
	—real-time RT-PCR using the primers and probes described in the ISF protocol (2020),
	—real-time RT-PCR using primers and probe of Menzel and Winter (Acta Horticulturae, in press).
	In case of a positive result of the detection test, a second testing method, different from the one used for detection, must be carried out with one of the RT-PCR methods mentioned above, using the same sample to confirm the identification."

	Vegetable products not elsewhere specified or included, fresh:	
	ex 1404 90 00	

# PART C

List of plants, together with the respective third countries of origin or dispatch, which do not require phytosanitary certificates pursuant to Article 73(2) of Regulation (EU) 2016/2031

	(1)	(2)
	Description of plants, plant products or other objects	Country of origin or dispatch
1.	Fruits of <i>Ananas comosus</i> (L.) Merrill	Any third country
2.	Fruits of Actinidia sp. Lindl	Any third country
3.	Fruits of Cocos nucifera L.	Any third country

	(1)	(2)
	Description of plants, plant products or other objects	Country of origin or dispatch
4.	Fruit and leaves of <i>Citrus</i> sp. L.	Any third country
5.	Fruit of Fortunella sp. Swingle	Any third country
6.	Fruit of Poncirus L. Raf	Any third country
7.	Fruit of Diospyros sp. L.	Any third country
8.	Fruits of <i>Durio zibethinus</i> Murray	Any third country
9.	Fruits (bolls) of Gossypium spp.	Any third country
10.	Grain of Oryza spp. L.	Any third country
11.	Leaves of Murraya spp.	Any third country
12.	Fruits of Musa	Any third country
13.	Fruits of Mangifera sp. L.	Any third country
14.	Fruits of <i>Phoenix dactylifera</i> L.	Any third country
15.	Fruits of Passiflora sp. L	Any third country
16.	Fruits of <i>Psidium</i> sp.	Any third country"

#### SCHEDULE 11

Regulation 16

# New Annex 13 to the Phytosanitary Conditions Regulation

## "ANNEX 13

List of plants, plant products and other objects for which a UK plant passport is required for their movement within Great Britain or for their introduction into Great Britain from a CD territory In this Annex:

- (a) 'Seeds Marketing Regulations' has the meaning given in regulation 2(1) of the Seeds (National Lists of Varieties) Regulations 2001(12);
- (b) the references to seed in paragraphs 2, 4, 5 and 6 do not include seed where it is subject to an exception described in Article 6(3) and the special requirements in Annex 8 or 10 do not apply in relation to the seed.
- 1. All plants for planting, other than seeds.
- **2.** Seed of the following species, where the seed is permitted to be marketed under the Seeds Marketing Regulations and the movement of the seed relates to its marketing:
  - (a) Allium cepa L.,
  - (b) Allium porrum L.,
  - (c) Phaseolus coccineus L.,

<sup>(12)</sup> S.I. 2001/3510; relevant amending instruments are S.I. 2011/464, 2016/106 (W.52), S.S.I. 2015/395, 2018/942.

- (d) Phaseolus vulgaris L.,
- (e) Pisum sativum L.,
- (f) Vicia faba L.
- 3. Seeds of the following species:
  - (a) Castanea Mill.,
  - (b) Capsicum spp L.,
  - (c) Solanum lycopersicum L.,
  - (d) Solanum tuberosum L.
- **4.** Seed of *Medicago sativa* L, where the seed is permitted to be marketed under the Seeds Marketing Regulations and the movement of the seed relates to its marketing.
- **5.** Seed of the following species, where the seed is permitted to be marketed under the Seeds Marketing Regulations and the movement of the seed relates to its marketing:
  - (a) Brassica napus L.,
  - (b) Brassica rapa L.,
  - (c) Glycine max (L.) Merrill,
  - (d) Helianthus annuus L.,
  - (e) Linum usitatissimum L.,
  - (f) Sinapis alba L.
- **6.** Seed of the following species, where the seed is permitted to be marketed under the Marketing of Ornamental Propagating Material Regulations 1999(13) and the movement of the seed relates to its marketing:
  - (a) Capsicum annuum L.;
  - (b) Helianthus annuus L.
- 7. Plants of *Abies* Mill., *Larix* Mill., *Picea* A. Dietr., *Pinus* L. and *Pseudotsuga* Carr over three metres in height, including felled or fallen trees, other than fruit, seeds, leaves or foliage.
- **8.** Wood, where it is considered to be a plant product and has been obtained in whole or in part from the following genera or species, other than wood which is bark-free:
  - (a) conifers (Pinales),
  - (b) Castanea Mill.
- **9.** Wood, where it is considered to be a plant product and has been obtained in whole or part from the following species, including wood which has not kept its natural round surface:
  - (a) Juglans L.,
  - (b) Platanus L.,
  - (c) Pterocarya L.
  - **10.** Isolated bark of the following genera or species:
    - (a) conifers (Pinales),
    - (b) Castanea Mill."

<sup>(13)</sup> S.I. 1999/1801.
