In the case of animals which are kept for less than 12 months and for which the net annual income does not include a sum in respect of beef special premium, the net annual income is to be calculated by deducting £102 from the figure in column 3 and then making a pro rata adjustment of the resulting figure.

In the case of animals which are kept for less than 12 months and for which the net annual income includes a sum in respect of beef special premium, the net annual income is to be calculated by first deducting £102 from the figure in column 3, then making a pro rata adjustment of the resulting figure, then adding to that figure the sum of £102 and (when the net annual income includes a sum in respect of extensification premium) the sum of £24 (when the extensification premium is paid at the lower rate) or £480 (when the extensification premium is paid at the higher rate).
