- (a) relevant material, other than susceptible material,
- (b) surface water which is used for irrigation or spraying of susceptible material, and
- (c) liquid waste discharged from industrial processing or packaging premises handling susceptible material.

(1B) Those surveys must also be based on the biology of Potato brown rot and the relevant production systems and must include—

- (a) in the case of susceptible material comprising plants of *Solanum tuberosum* L., visual inspection of the growing crop at appropriate times, or the sampling of both seed and other potatoes in the growing season or in store, which must include official visual inspection by cutting of tubers;
- (b) in the case of seed potatoes and, where appropriate, other potatoes, official testing of samples using the method set out in EPPO PM 7/21;
- (c) in the case of susceptible material comprising plants of *Solanum lycopersicum* L., visual inspection at appropriate times of at least the growing crop of plants intended for replanting for professional use;
- (d) for host plants, other than susceptible material, and for water including liquid waste, official testing.

(1C) The collection of samples for the purposes of sub-paragraph (1B) must be based on sound scientific and statistical principles and the biology of Potato brown rot and take into account relevant potato production systems of susceptible material and other host plants of Potato brown rot.”;

(c) in sub-paragraph (2)—

(i) in paragraph (a)(i), for the words from “Annex”, in the first place where it occurs, to the end substitute “EPPO PM 7/21”;

(ii) tomatoes which are growing or have been harvested that are from the same source as any contaminated tomatoes;

(iii) potatoes or tomatoes which are growing or have been harvested that are under official control and are suspected to be contaminated with Potato brown rot;

(iv) potatoes which are growing or have been harvested that are clonally related to any potatoes that have been grown at the contaminated place of production;

(v) potatoes or tomatoes which are growing nearby the contaminated place of production, including those sharing production equipment and facilities directly or through a common contractor;

(vi) surface water used for irrigation and spraying from any source confirmed or suspected to be contaminated with Potato brown rot;

(vii) surface water used for irrigation and spraying from a source used in common with the contaminated and possibly contaminated places of production;

(viii) places of production which are flooded or have been flooded with contaminated or possibly contaminated surface water;

(ix) surface water used for irrigation or spraying of the contaminated place of production or flooded fields at the contaminated place of production;”;

(ii) in paragraph (e), for “in accordance with point 2(i) of Annex 5 to [Directive 98/57/EC](#)” substitute “having regard to the relevant factors”;
