PART 2

Conditions before first use for border control purposes

Noise mitigation measures

17.—(1) Noise mitigation measures must be installed and be fully functioning.

(2) The developer must obtain a relevant approval confirming the noise mitigation measures are sufficient to ensure noise levels at each of the residential receptors will not exceed the levels at the corresponding times of day outlined in Table 3 in paragraph 29.

(3) In this paragraph, “noise mitigation measures” include noise attenuation fencing and developable area management controls.
